

European Institute of Plastic Surgery Expands Facelift Services Across Cyprus and Beyond

July 31, 2024

Nicosia, Cyprus - July 31, 2024 -
The European Institute of Plastic Surgery (EIPS), led by board-certified plastic surgeon Dr. Demetris Stavrou, has announced the expansion of its facelift services across clinics in Nicosia, Limassol, Athens, and Malta. This move is intended to enhance the treatment options available, helping patients achieve a youthful and natural appearance.

Facelifts are part of EIPS's broader range of facial surgery services. This procedure targets visible signs of aging by addressing sagging skin, deep creases, and muscle tone loss in the face and neck. Each surgery is tailored to fit the needs of the individual, with the aim of delivering natural and long-lasting results.

Dr. Demetris Stavrou shared his thoughts on the service expansion: "A facelift can truly rejuvenate someone's appearance. We've observed not only physical transformations but also emotional boosts among our patients. Our aim is to make this service accessible to more people in Cyprus, Greece, and Malta."

The process at EIPS begins with a detailed consultation to understand the patient's specific needs and goals. The surgery itself is meticulous, focusing on lifting and tightening the underlying facial muscles and removing

excess skin. While recovery times can vary, the results are designed to look natural and last for a long time.

In addition to facelifts, EIPS offers a variety of other surgical and non-surgical treatments. These include body contouring, breast surgeries, and various skin treatments. The institute's advanced techniques and commitment to patient care make it a reliable choice for cosmetic and reconstructive surgery in the region.

Dr. Stavrou highlights the personalized nature of each facelift procedure. "Every face is unique, so every facelift should be as well. We spend time understanding what each patient wants to achieve and tailor the surgery accordingly. This approach ensures the most natural and satisfying results possible."

EIPS also provides extensive resources to help patients make informed decisions about their treatments. These resources include payment options and educational videos. The clinic's social media presence, especially its Instagram Page, offers additional insights into the variety of procedures and expected outcomes.

For those interested in more details about the facelift procedure, comprehensive information is available on the EIPS website at https://eips.com/procedures/facelift/. The page offers an in-depth look at the different techniques used, recovery times, and before-and-after photos of previous patients.

The expansion of facelift services is part of EIPS's dedication to providing advanced treatments and exceptional patient care. By focusing on individualized treatment plans, EIPS aims to help more people achieve their desired appearance and improve their overall well-being.

Patients wanting facelift procedures at EIPS can schedule consultations at their clinics in Nicosia and Limassol in Cyprus, Athens in Greece, and Malta. These clinics feature modern facilities and are staffed by experienced medical professionals who maintain high standards of care. Details about these services and other procedures offered by Dr. Demetris Stavrou can be found at https://www.stavrouplasticsurgery.com/cyprus/.

For updates and more information, potential patients are encouraged to visit the European Institute of Plastic Surgery's social media platforms, including their Instagram Page, for the latest news and updates on their services.

Dr. Stavrou concluded, "We are excited to expand our facelift services and welcome new patients. Our team is committed to delivering not only beautiful results but also a positive and supportive experience throughout the entire process."

This expansion represents a significant step in EIPS's mission to provide comprehensive plastic surgery solutions tailored to the unique needs of each patient. With clinics located in key cities, the European Institute of Plastic Surgery is well-positioned to serve a wider range of patients seeking high-quality cosmetic and reconstructive surgery. Additional services like body surgery and hair removal can also be explored further on their site.
