HVAC Company Opens New Location in East Lake-Orient Park, Florida: Expanding HVAC Services in Brandon, Riverview, and Valrico - Rolando's HVAC

August 05, 2024

August 05, 2024 -
EAST LAKE-ORIENT PARK, FL - HVAC Company Rolando's HVAC proudly announces the opening of a new location at 4205 Orient Rd, Tampa, Florida 33610. This strategic expansion is set to better serve the communities of Brandon, Riverview, and Valrico, offering top-tier indoor air quality, air conditioning, and heating solutions.

Rolando Mojarrieta, the founder and owner, highlights the commitment to excellence: "Our goal is to provide dependable HVAC services. With our new base in East Lake-Orient Park, we are poised to meet the needs of these communities more efficiently and enhance our service delivery across the region."

Rolando's HVAC offers a comprehensive range of services designed to improve home comfort and energy efficiency. They install high-efficiency heating and air conditioning systems tailored to clients' needs, aimed at reducing energy consumption and lowering utility bills. Their expert technicians manage everything from assessment to final testing, ensuring a thorough and reliable service. Their offerings include HVAC maintenance, repair, and replacement, AC repair, installation, and maintenance, heater repair, installation, and maintenance, as well as services for furnaces and heat pumps.

Rolando's HVAC's maintenance services include thorough inspections, cleaning of air filters and compressors, lubrication of mechanical parts, and performance testing. Rolando's HVAC also offers a maintenance service plan to ensure regular upkeep and optimal performance of HVAC systems. Rolando's HVAC offers prompt repairs for issues like compressor malfunctions, duct leaks, thermostat failures, and refrigerant leaks. The company provides a 24/7 call service to address urgent issues promptly. Clients can upgrade to more energy-efficient HVAC systems with Rolando's HVAC's comprehensive replacement services. The team handles everything from evaluating the current system to installing and calibrating the

new unit, aiming to improve comfort and reduce energy costs.

Rolando's offers extensive Residential HVAC Services, with tailored heating and cooling solutions for new and existing homes, covering design, installation, maintenance, and repair. Services aim to provide optimal comfort and energy efficiency for homes. Ductless Mini Split Systems provides efficient heating and cooling solutions for homes without ductwork. The company offers installation, maintenance, and repair services for ductless mini-split systems designed to offer consistent comfort and high energy efficiency.

Attic Insulation Installation enhances energy efficiency with attic insulation services. Rolando's HVAC assesses, recommends, and installs insulation materials to improve thermal performance, aiming to reduce heating and cooling costs. Rolando's HVAC designs, installs, and repairs duct systems to promote efficient airflow and system performance. Services include duct sealing and insulation to ensure optimal efficiency and air quality, helping to maintain comfort throughout the home.

In addition to extensive HVAC services, Rolando's HVAC is committed to improving indoor air quality through advanced solutions such as air purifiers, upgraded air filters, and enhanced ventilation systems. These services address allergens, pollutants, and humidity to ensure a healthier living environment. Their expertise in handling duct systems, air handlers, and smart thermostat systems guarantees optimal airflow and temperature control.

Rolando;s HVAC has a commitment to energy efficiency, environmental sustainability, and quality. Rolando's HVAC offers high-efficiency heat pumps, Energy Star-rated appliances, and advanced air conditioning systems, aligning with the Inflation Reduction Act's goals. These products have high Seasonal Energy Efficiency Ratio (SEER) ratings, allowing customers to take advantage of tax incentives. In addition to promoting energy efficiency and environmental sustainability, Rolando's HVAC ensures long-term reliability through comprehensive warranty programs covering HVAC systems. This commitment to quality provides customers with peace of mind and confidence in their home services.

Rolando's HVAC participates in local community events and values customer feedback from platforms like Google, Yelp, and Facebook to improve services. The company ensures transparent pricing, keeping projects on budget and providing clear costs. This approach supports its reputation for reliability and customer-focused service.

The company services most components including air conditioning units, which are devices that cool indoor spaces by removing heat and moisture from the air. Heat Pumps, which are systems that transfer heat from one place to another, providing both heating and cooling. Furnaces, which are heating systems that generate heat through the combustion of fuel or electricity. Boilers, which are systems that heat water for various purposes, including space heating and hot water supply. Smart Thermostats, which are advanced

thermostats that can be programmed and controlled remotely for optimal temperature regulation. Ventilation Systems, which are systems designed to provide fresh air and remove stale air from indoor spaces. Air Purifiers (including Ultraviolet), which are devices that remove contaminants from the air to improve indoor air quality, with ultraviolet purifiers using UV light to kill bacteria and viruses. Heat Exchangers, which are devices that transfer heat between two or more fluids without mixing them. Condensers, which are components that condense refrigerant from its gaseous to liquid state, releasing heat. And evaporators, which are components that absorb heat from the air, causing refrigerants to evaporate and cool the air. Plus the various parts and components related to these systems.

Based in Tampa, Florida, Rolando's HVAC provides residential HVAC services, focusing on energy efficiency and sustainability. They specialize in installing, maintaining, repairing, and replacing HVAC systems, ensuring optimal indoor air quality and comfort.
