

# Regen Revolution Now Offers Edge Applicator Treatment, The Latest Innovation by Emsculpt Neo®

*August 26, 2024*

Denver, Colorado - August 26, 2024 - PRESSADVANTAGE -

Regen Revolution introduces a groundbreaking new approach to treating the lateral abdomen – the first and only non-invasive procedure that simultaneously addresses both Muscle and Fat in the lateral abdomen in just 30 minutes.

Emsculpt NEO® is considered a breakthrough treatment in non-invasive body shaping. Finally, it brings the solution for the most desirable area - the lateral abdomen. We are delighted to announce that Edge treatment is now available in our practice. This revolutionary procedure simultaneously delivers heat and magnetic energy resulting in more fat reduction and muscle growth than any single stand-alone gold standard procedure. In addition, Edge treatment offers patients the biggest spot size in the industry combining HIFEM+ and RF technologies in a single applicator. FDA-cleared for non-invasive lipolysis of the abdomen and improvement of abdominal tone, strengthening of the abdominal muscles, and development of a firmer abdomen, Edge treatment by Emsculpt NEO® helps patients achieve next-level contouring results.

“The current approach to treat lateral abdomen is mainly through the circumferential reduction; however, overall body contour is affected by muscle structure as well,” shared Rachel Anders, CEO. “Treatment with the Edge Applicators goes beyond waistline reduction to address contouring through muscle tone, so I’m thrilled to now offer this combination to our patients,” added Dr. Cook, DC.

Edge applicators treat four fat spots and all oblique muscles simultaneously in just 30 minutes. Whether you seek a reduction in abdominal circumference or improvement of your oblique muscle tone, you might be a great candidate for this procedure. The therapy feels like an intense workout with a warming sensation in the treated area. You can lay down and relax during the treatment.

For optimal results, Regen Revolution recommends four 30-minute treatments in a weekly session. Best results will be seen after 3-months.

Regen Revolution continues to lead Colorado in offering innovative solutions designed to support natural body regeneration and overall well-being. With the introduction of the EMSculpt NEO® Edge treatment, the clinic expands its range of non-invasive body contouring options, staying at the forefront of medical advancements. The clinic is committed to providing patients with the most effective treatments available, supported by personalized care and expert guidance.

Regen Revolution continues to lead Colorado in offering innovative solutions designed to support natural body regeneration and overall well-being. With the introduction of the EMSculpt NEO® Edge treatment, the clinic expands its range of non-invasive body contouring options, staying at the forefront of medical advancements.
