

Chicago Clinic Unveils New Healing Treatments for PTSD at IV Solution & Ketamine Centers

August 30, 2024

CHICAGO, IL - August 30, 2024 - PRESSADVANTAGE -

The IV Solution & Ketamine Centers of Chicago has announced new services, adding treatments for mental health conditions and chronic pain. Known as Chicago's first private facility to offer proven intravenous ketamine therapies, the center remains a leader in treating issues like depression, anxiety, PTSD, and fibromyalgia.

The core of their treatment is intravenous (IV) ketamine therapy. This method effectively tackles treatment-resistant depression, anxiety disorders, PTSD, bipolar disorder, chronic pain, migraines, and fibromyalgia. By delivering ketamine directly into the bloodstream, the treatment offers quick relief for many patients. Their experienced team, made up of anesthesiologists and registered nurses, creates personalized plans for each patient.

Responding to a growing need for new treatments, the IV Solution & Ketamine Centers of Chicago now includes Stellate Ganglion Block (SGB) therapy for PTSD. This involves an injection in the neck to block

nerve signals causing PTSD symptoms. The clinic reports that this therapy helps reduce PTSD symptoms and improves patients' quality of life.

Another addition is NAD+ Therapy, which uses a coenzyme found in all living cells to boost mental clarity, alertness, concentration, and memory. By administering NAD+ intravenously, the treatment aims to help those experiencing cognitive decline and mental fatigue due to aging or chronic conditions.

Bal Nandra, M.D., a representative of the center, shared thoughts on their new services: "Our goal has always been to offer the latest treatment options for those suffering from mental health conditions and chronic pain. By adding these services, we aim to help even more people who need effective medical solutions."

To make these treatments more accessible, the clinic has teamed up with CareCredit to provide financial help to patients who might struggle to afford care. This partnership seeks to eliminate financial hurdles and open up health and well-being opportunities for more people.

The center also provides extensive patient resources, such as information about what to expect during treatment, answers to frequently asked questions, testimonials from previous patients, and forms for new patients. These resources are intended to educate and support patients throughout their treatment journey. Patients can find more details about their services and resources directly on the IV Solution & Ketamine Centers of Chicago website.

Dr. Nandra further stated, "We understand that navigating mental health treatments can be overwhelming. Our team is dedicated to providing not only the best medical care but also the necessary information and support to help our patients feel comfortable and informed."

The IV Solution & Ketamine Centers of Chicago actively engage with their community on social media platforms like Instagram and Twitter. They also have a YouTube channel with patient testimonials and educational videos about their treatments. These platforms help the center improve online visibility and connect with a wider audience.

For those in need of fibromyalgia management solutions, the center's expanded services offer hopeful options. The specialized treatments aim to reduce the chronic pain and fatigue that come with fibromyalgia, helping improve the daily lives of those affected by this condition.

IV Solution & Ketamine Centers of Chicago's dedication to innovation and patient care continues to receive positive feedback. Patients often share their success stories, showing the real-life impact of these treatments. With an overall Google rating of 4.6 out of 5 stars, it's clear the community trusts the center.

The center invites anyone seeking treatment for anxiety, chronic pain, treatment-resistant depression, fibromyalgia, OCD, and PTSD to explore their services. Potential patients can visit their website, follow their Instagram page, or view more information and testimonials on their YouTube channel.

For more details, visit their website at IV Solution & Ketamine Centers of Chicago, follow their updates on Instagram, and watch patient stories on YouTube. The clinic is committed to continuing its mission of providing effective and innovative treatments to improve mental health and well-being.

By introducing new options for PTSD, depression, and chronic pain, the IV Solution & Ketamine Centers of Chicago is setting higher standards in patient care and accessibility. This media story showcases the center's ongoing efforts to offer comprehensive and compassionate care.
