

Homeward Environmental Unveils Indianapolis IN Initiative: Free Exterior Drainage Systems for Veterans

August 29, 2024

August 29, 2024 -

Homeward Environmental LLC has announced a new initiative aimed at supporting veterans in the Indianapolis area. This fall, the company will select one veteran to receive free replacement downspouts. This project aligns with Homeward Environmental's mission to give back to those who have served the nation.

"We are deeply committed to making a positive impact on our community. Providing this service to a veteran is one way we can show our appreciation for the sacrifices these individuals have made," said Todd Bell of Homeward Environmental.

Homeward Environmental LLC offers a range of services, including French Drains, Buried Downspouts, Yard Drainage, Retaining Walls, Gutters, and Gutter Guards. The company's expertise allows them to tackle various water management issues effectively.

Proper water management around homes is important in preventing damage. Homeward Environmental's service of burying downspouts helps direct water away from home foundations. This reduces the risk of water

infiltration and structural damage. These services are particularly useful in preventing basement flooding and moisture buildup in crawl spaces.

"Offering free replacement downspouts to a veteran is our way of giving back to those who have already given so much," added Bell. "We hope this small act of gratitude will make a difference in a veteran's life and home."

Homeward Environmental specializes in installing different types of exterior drainage systems Indianapolis IN, which includes French drains. These systems redirect surface water and groundwater away from areas to prevent it from penetrating building foundations.

The company also addresses yard drainage issues. Their tailored solutions help prevent water buildup, keeping landscapes functional and attractive regardless of the weather. As a yard drainage contractor in Indianapolis, they ensure each solution fits the unique needs of the property.

In constructing retaining walls, Homeward Environmental manages slopes and prevents soil erosion while enhancing the aesthetic appeal of properties. They take pride in their personalized approach, ensuring clients receive durable and effective solutions.

Additionally, the company offers gutter installation and maintenance services. Properly maintained gutters are essential for directing rainwater away from homes, which prevents damage to foundations and landscaping. Gutter guards are another service provided to keep gutters free of debris, reducing the need for frequent cleaning and ensuring consistent functionality.

Homeward Environmental emphasizes safety and regulatory compliance in all their operations. They adhere to the latest industry standards and local regulations to ensure that environmental hazards are properly mitigated. Customer satisfaction is a priority, and they offer personalized services tailored to meet specific needs.
