

OptiSkyn Opens Advanced Skin Care Clinic in Quad Cities Offering Revolutionary Red Light Therapy

August 27, 2024

August 27, 2024 -

OptiSkyn Skin Care Clinic has recently opened a new location in the Quad Cities, specifically in Davenport, IA. This clinic, known for its advanced skincare treatments, is now offering Red Light Therapy as an innovative addition to its services. This therapy uses specific wavelengths of light to stimulate cellular functions beneath the skin. It helps reduce inflammation, speeds up healing, and boosts collagen production. It's effective for wrinkles, fine lines, scars, and wounds, providing a non-invasive treatment option.

This addition fits well with OptiSkyn's goal of offering safe and effective modern skincare solutions. Yvonne Wright, the founder, is a certified Plasmatologist and licensed Cosmetologist with over four years of experience. She expressed her enthusiasm for the new therapy. "Red Light Therapy is a significant advancement in our skincare offerings. It enhances our ability to provide safe, non-invasive treatments that deliver noticeable results," said Wright.

OptiSkyn's new service complements its existing offerings like Plasma Pen treatments and various skin

rejuvenation packages. Plasma Pen treatments are popular for lifting, tightening, and rejuvenating the skin by boosting collagen and elastin production. When combined with Red Light Therapy, clients have a non-surgical, effective option for skin improvement.

The clinic's skin rejuvenation packages are tailored to meet different needs. Options include the Starter Package for minor scars or wrinkles, the Upper or Lower Face Transformation, and the Full Facial Transformation. Each package addresses specific skin concerns, ensuring a personalized approach to skincare.

Yvonne Wright emphasized the clinic's dedication to maintaining high standards of care. "Our team is committed to staying updated with the latest skincare technologies to ensure our clients receive the most suitable and effective treatments," she said. This commitment ensures that each client receives a customized treatment plan specific to their skin needs.

OptiSkyn uses only treatments that are laboratory-tested and FDA-approved, aiming for the highest safety and effectiveness in all services. This focus is evident in every aspect of the clinic's operations, from carefully choosing treatment options to providing comprehensive care during the client's skincare journey.

Red Light Therapy at OptiSkyn offers several benefits, including better skin texture, reduced aging signs, and firmer skin. The therapy penetrates the skin's surface to activate cellular functions, which promotes natural healing and renewal without causing damage. Clients often see noticeable improvements after several sessions, making it an appealing alternative to invasive procedures.

OptiSkyn Skin Care Clinic is committed to continuous innovation and expanding its range of services. By offering Red Light Therapy in their Davenport, IA, location, the clinic aims to bring advanced skin care solutions to more people. This new service reinforces OptiSkyn's effort to lead in skincare innovations and maintain top-notch client care.

Yvonne Wright commented on the clinic's mission. "Our goal has always been to provide our clients with the most advanced and effective skin care treatments available. The introduction of Red Light Therapy is another step in fulfilling that mission."
