

Go Industries Inc. Launches Cutting-Edge Winch Grille Guards for Heavy-Duty Trucks, Enhancing Front-End Protection

August 27, 2024

Richardson, TX - August 27, 2024 - PRESSADVANTAGE -

Go Industries Inc. announces the release of their new winch grille guards designed specifically for heavy-duty trucks. This new product line caters to the Chevrolet C4500, C6500, Ford F650, F750, and International CV515 trucks. The introduction of these grille guards shows the company's ongoing commitment to providing durable and functional accessories for fleet, truck, and law enforcement vehicles.

The winch grille guards are built to enhance front-end protection without the need for cutting or drilling during installation. Designed for convenience, these units feature a tilt body mechanism that allows them to move forward, giving easy access to the hood. Each grille guard is reinforced with a locking mechanism that includes two OEM-style latches and safety pins for a secure mount.

"Go Industries has always aimed to deliver high-quality and practical products for the heavy-duty truck market," said a representative from Go Industries. "The new winch grille guards are a testament to our

commitment to innovation and customer satisfaction. These new products not only provide robust protection but also offer simplicity in installation and maintenance."

The grille guards come fully welded and include headlight brush guards made from 14-gauge tubing. Additionally, the 2.5-inch center cross tubes and the laser-cut 18-gauge center screen are built for maximum durability. The units are equipped with a winch tray that can support up to a 16.5k winch, accommodating most major brands. This ensures that the guards are not only durable but also capable of handling tough conditions.

For those interested in the Chevy winch grille guard, the product is specifically designed for the Chevrolet C4500 and C6500 models. These guards provide comprehensive front-end protection while still allowing for easy access to the hood. The black textured powder coat finish enhances both durability and visual appeal.

"The introduction of these grille guards underscores our commitment to meeting the specific needs of our varied customer base, from regular truck owners to law enforcement agencies," added the Go Industries representative.

In addition to the Chevy models, Go Industries also offers the Ford winch grille guard, which is tailored for the Ford F650 and F750 trucks. Similar to the Chevrolet models, these guards assure no cutting or drilling during installation and are crafted for durability and ease of use.

Moreover, the new range of winch grille guards includes Heavy Duty Headache Racks specifically designed for additional truck protection. These racks add another layer of safety, complementing the sturdy nature of the grille guards.

Since its founding in 1978, Go Industries has continuously worked to offer innovative and durable solutions to its customers. The company's repertoire now includes a wide array of truck accessories, law enforcement vehicle gear, and custom manufacturing services. For those interested in comprehensive truck protection solutions, the Medium Duty Grille Guards and BigTex Grille Guards provide all-encompassing options. The new product line is another step towards broadening their extensive range of high-quality products designed to meet the changing needs of their clientele.

For those interested in checking out the new medium-duty grille guards, details and purchasing options are available on the Go Industries website. Pricing for the guards ranges between \$1,772.75 and \$2,190.78, offering competitive rates for robust and well-engineered truck accessories.

All grille guards and other accessories are manufactured in the USA, ensuring a high standard of quality. Go Industries also accepts cryptocurrencies as a payment option, showing the company's forward-thinking

approach to commerce. For additional support and queries, customers can reach out through the contact information provided on the site.

With its long-standing tradition of excellence, Go Industries continues to support its mission of delivering high-quality, reliable products for trucks and law enforcement vehicles. The release of the winch grille guards further strengthens their position as a trusted provider in the industry.

For more information on the new winch grille guards, visit the Go Industries website. Additional details on specific models like the Chevy winch grille guard and the Ford winch grille guard are also available online. Product instructions, a catalog, and instructional videos can also be found on their site to assist customers with their purchasing decisions.
