

Glam Essence Med Spa Revolutionizes Industry with Specialized Treatments for Melanated Skin

August 29, 2024

Tustin, California - August 29, 2024 - PRESSADVANTAGE -

Glam Essence Med Spa, founded by minority business owners Kaia Tucker-Bosivert and Maia Tucker, is excited to announce new specialized treatments tailored for melanated skin types. These treatments fill a significant gap in the med spa industry, offering inclusive aesthetic services that meet the unique needs of diverse skin tones and textures.

The spa offers a variety of non-invasive beauty treatments to enhance natural beauty. Services include solutions for face-related issues like fine lines and wrinkles, elasticity, even skin tone, vibrancy, oily and congested skin, and acne scars. Body treatments focus on skin texture and volume loss, while hair treatments specifically address hair loss.

"We are delighted to offer these specialized treatments," said Kaia Tucker-Bosivert, co-founder of Glam Essence Med Spa. "Our goal has always been to provide inclusive and effective aesthetic services. By focusing on the needs of melanated skin, we ensure that our clients receive appropriate and targeted

treatments that offer real benefits."

The spa's services include advanced facial treatments such as injectables for fine lines and wrinkles, therapies that stimulate collagen for elasticity and firmness, and various skin resurfacing techniques. For body care, options include methods to improve skin texture through exfoliation and light-based treatments for brown spots. Additionally, Sculptra BBL, a non-surgical treatment that stimulates collagen production, addresses volume loss. For those dealing with hair loss, PRP (Platelet-Rich Plasma) injections use the patient's own plasma to encourage hair growth.

Other offerings at Glam Essence Med Spa include the HydraFacial, which combines cleansing, exfoliation, extraction, hydration, and antioxidant protection in one session. Microneedling with SkinStylus, chemical peels, and body sculpting with wood therapy are also available, expanding the range of services provided.

"Representation in the beauty industry is important. What we offer isn't just about aesthetics; it's about inclusivity and understanding the unique requirements of our clients," added Maia Tucker, co-founder.

The founders draw from their personal experiences to ensure that each client at Glam Essence Med Spa receives treatments that are effective and respectful of their unique skin characteristics. The spa uses state-of-the-art technology and techniques designed specifically for melanated skin, reinforcing their commitment to diversity and inclusion in the med spa industry.

Staff at Glam Essence Med Spa are specially trained to address a wide range of skin tones and textures. This ensures that every treatment is not only suitable for diverse skin types but also delivers the desired results. The spa's goal is to educate clients, giving them the knowledge they need to care for melanated skin.

"Our aim has always been to make advanced skincare accessible and suitable for people of all backgrounds," said Tucker-Bosivert. "Everyone deserves to feel confident and beautiful in their skin, and we are committed to making that a reality."

Glam Essence Med Spa is designed to be welcoming and inclusive, ensuring all clients feel comfortable and valued. The spa's mission goes beyond beauty, focusing on education and empowerment, helping clients understand how to care for and maintain their skin effectively.

Glam Essence sets a new standard in the med spa industry. By prioritizing diversity and inclusion, the spa stands out from others in the market, providing treatments that cater to everyone's specific needs.
