

OptiSkyn Unveils Red Light Therapy at Skin Care Clinic in Davenport, IA for Advanced Rejuvenation

September 11, 2024

September 11, 2024 -
OptiSkyn Skin Care Clinic is excited to announce the addition of Red Light Therapy to its services in Davenport, Iowa. This new treatment will complement the clinic's existing range of services, which are known for helping reduce blemishes, sunspots, fine lines, and wrinkles.

Red Light Therapy is a non-invasive treatment that uses specific wavelengths of light to penetrate the skin. This process activates cellular functions that can reduce inflammation, speed up healing, and boost collagen production. The result is a healthier, more radiant complexion. This therapy is effective for treating various skin issues, including wrinkles, scars, and persistent wounds.

Yvonne Wright, the founder of OptiSkyn Skin Care Clinic, is thrilled about the new addition. "The introduction of Red Light Therapy aligns perfectly with our mission to offer the most advanced and effective treatments available," Wright said. "Our goal is to provide our clients with options that deliver noticeable improvements in their skin's health and appearance."

In addition to Red Light Therapy, the clinic continues to offer its Plasma Pen treatments. This non-invasive procedure uses plasma energy to create tiny injuries on the skin's surface, stimulating the body's natural healing process. This results in a significant increase in collagen and elastin production, which leads to tighter and rejuvenated skin.

OptiSkyn offers various skin rejuvenation packages tailored to meet the specific needs of its clients. The Starter Package is designed for individuals looking to address minor scars or small wrinkle spots. The Upper or Lower Face Transformation focuses on areas like the forehead, crow's feet, cheeks, nasal folds, or upper lips. For those wanting a comprehensive treatment, the Full Facial Transformation provides complete rejuvenation targeting the upper, mid, and lower face.

The clinic emphasizes laboratory-tested and FDA-approved treatments, ensuring the highest standards of safety and effectiveness. OptiSkyn also addresses the unique skincare needs of men with customized packages designed specifically for them.

Led by Yvonne Wright, who has over four years of experience and more than 2,100 hours of training and research, OptiSkyn has overseen over 100 skin transformations. This highlights the clinic's commitment to achieving positive outcomes for its clients.

OptiSkyn is dedicated to providing personalized skincare solutions. By tailoring treatments to the unique needs and goals of each client, the clinic ensures the best possible care. With the introduction of Red Light Therapy, OptiSkyn enhances its ability to address a broader range of skin concerns effectively.

"We are always looking for ways to stay ahead in the skincare field and provide our clients with the best available treatments," Wright added. "The new Red Light Therapy offers another excellent option for those seeking to improve their skin's health and appearance in a safe, non-invasive manner."
