Chicago Clinic Leads Innovative Healing for PTSD with New Ketamine and Stellate Ganglion Block Therapy

September 24, 2024

CHICAGO, IL - September 24, 2024 -
IV Solution & Ketamine Centers of Chicago has announced new services to enhance the treatment options for mental health conditions and chronic pain. As the first private clinic in Chicago to offer intravenous ketamine therapy, the center continues to lead in innovative treatments, now introducing Stellate Ganglion Block (SGB) therapy and NAD+ Therapy.

IV Solution & Ketamine Centers of Chicago specializes in Intravenous Ketamine Therapy, which is effective in treating conditions like treatment-resistant depression (TRD), anxiety, PTSD, bipolar disorder, chronic pain, migraines, and fibromyalgia. This therapy involves administering ketamine, a strong anesthetic and pain reliever, directly into the bloodstream. It's shown promise in quickly relieving symptoms where other treatments have failed.

Adding to their service lineup, the center now offers Stellate Ganglion Block (SGB) for PTSD. This treatment involves an injection into the neck to block nerve signals that trigger PTSD symptoms, providing significant

relief. The addition of NAD+ Therapy widens the clinic's offerings further. This intravenous therapy uses a coenzyme found in all living cells to improve mental clarity, alertness, concentration, and memory.

Dr. Bal Nandra, M.D. of IV Solution & Ketamine Centers of Chicago, commented on these new additions: "Our goal has always been to provide comprehensive, cutting-edge treatments for our patients. Adding SGB and NAD+ Therapy to our services allows us to address a wider range of mental health conditions and chronic pain issues. We are committed to helping our patients find relief and improve their quality of life."

Recognizing how expensive healthcare can be, the clinic has partnered with CareCredit to offer financial assistance. This partnership provides financing options, making these advanced treatments more accessible to patients who might otherwise struggle to afford them.

The center also offers extensive patient resources to help individuals make informed decisions. These resources include detailed information on what to expect during treatments, answers to frequently asked questions, testimonials from previous patients, and forms for new patients to fill out.

Patient feedback has been very positive, highlighting the clinic's commitment to effective treatment and patient care. The center stays active on social media platforms like Instagram and Twitter, and hosts a YouTube channel featuring patient testimonials and educational videos about their treatments.

The wide range of services and patient resources show the clinic's mission of providing advanced, effective treatments for various mental health conditions and chronic pain. Dr. Nandra emphasized the importance of comprehensive care: "Every treatment we offer is designed to address the unique needs of our patients. By providing thorough evaluations and personalized therapy plans, we ensure that our patients receive the best possible care."

Reflecting on the clinic's impact, patient testimonials have been heartfelt and encouraging. One patient shared, "The staff at IV Solution & Ketamine Centers of Chicago have changed my life. After years of struggling with depression and chronic pain, I finally have hope and relief."

The clinic's commitment to improving patient outcomes is clear in the comprehensive approach they take. They combine advanced medical treatments with a supportive patient environment, which not only alleviates symptoms but also enhances the overall well-being of individuals seeking treatment.

To learn more about the innovative treatments at IV Solution & Ketamine Centers of Chicago, visit their website, follow their Instagram, or watch educational and testimonial videos on their YouTube channel. For ongoing updates and media story coverage, follow their Twitter.

Dr. Nandra concluded, "Our mission is to offer hope and healing to those who have struggled to find effective treatment elsewhere. We will continue to innovate and expand our services to meet the evolving needs of our patients."

As the clinic continues its mission, the community can look forward to ongoing contributions to the understanding and treatment of complex conditions like anxiety, chronic pain, TRD, fibromyalgia, OCD, and PTSD.
