# AGI Fabricators Enhances Oval Ductwork Manufacturing to Meet SMACNA Standards

*September 25, 2024*

MILWAUKEE, WI - September 25, 2024 -
AGI Fabricators has announced improvements to its oval ductwork manufacturing capabilities, now meeting the standards outlined by the Sheet Metal and Air Conditioning Contractors' National Association (SMACNA). The introduction of advanced techniques and equipment in oval ductwork fabrication aligns with the industry's need for efficient and durable HVAC systems.

Their oval ductwork is designed to improve airflow, reduce pressure drops, and ensure high performance. This type of ductwork is widely used in HVAC applications and industrial settings that require reliable ventilation. Brad Landry, CEO of AGI Fabricators, says, "Our aim is to keep pace with industry advancements to meet the evolving needs of our clients. The upgrades to our oval ductwork fabrication processes are a testament to our commitment to delivering high-quality, innovative solutions."

Oval ductwork has a broad range of applications and can be found in places such as industrial manufacturing plants, warehouses, schools, and medical facilities. The benefits of oval ductwork include durability, low maintenance, and an easier installation process. These advantages make it an increasingly favored choice over traditional rectangular ductwork.

More information about their oval ductwork offerings can be found on the company's webpage https://agifabricators.com/spiral-and-oval-ductwork/. AGI Fabricators' manufacturing facility is equipped with modern technology that allows them to produce ductwork with consistent quality and precision. The facility spans 182,500 square feet and is supported by 11 cranes and flexible floor space across five assembly bays. This expansive environment enables AGI Fabricators to handle complex projects and large-scale productions efficiently.

In addition to oval ductwork, AGI Fabricators offers a range of services, including custom fabrication, ASME code welding services, and custom fabricated blast gates. The company also works on equipment fabrication, process skids, ductwork fabrication, pipe fabrication, and structural fabrication. These services cater to diverse industries, ensuring tailored solutions for different project requirements.

Meeting SMACNA standards holds particular significance. These standards ensure that AGI Fabricators' ductwork products are high quality, reliable, and built to last. Landry explains, "Meeting SMACNA standards is a crucial part of our process. It assures our clients that they are getting products that not only meet but exceed industry expectations in terms of performance and safety."

Founded in 1893, AGI Fabricators has a long history in the metal fabrication industry. The firm has evolved over the years, continually updating its technology and expanding its expertise. This longevity brings a depth of experience to every project they undertake. Today, the company has processed over 1,600,000 pounds of steel and has a combined experience of 333 years among its team members.

The company's value-added services further enhance their offerings. These include additional processes or improvements that add value to their products, such as finishing, assembly, and testing. These services enable AGI Fabricators to provide comprehensive solutions that go beyond basic fabrication.

A key aspect of AGI Fabricators' success is their commitment to client-specific solutions. From custom fabrication to same-day shipping on stock products, the company aims to meet diverse client needs quickly and efficiently. For a broader look into their wide variety of services, visit AGI Fabricators on their website. This client-centric approach has earned the company a strong reputation in the industry.

Reflecting on the company's journey, Landry states, "Being in the business since 1893 has allowed us to refine our processes and better understand our clients' needs. We're proud of our history and even more excited about the innovative steps we're taking to enhance our future offerings."

In short, AGI Fabricators continues to be a reliable provider of metal fabrication solutions, committed to quality and innovation. The recent enhancements in their oval ductwork capabilities demonstrate their dedication to meeting and exceeding industry standards.
