Machine Specialty & Manufacturing, Inc. Achieves Prestigious API 6A Certification for High-Quality Blind Flanges

October 01, 2024

Youngsville, Louisiana - October 01, 2024 -
Machine Specialty & Manufacturing, Inc. has received the API 6A-2140 certification from the American Petroleum Institute (API) for its blind flanges. This recognition highlights the company's focus on quality, safety, and performance in its manufacturing processes.

The API 6A certification is known worldwide as a standard for wellhead and Christmas tree equipment used in the petroleum and natural gas industries. This certification ensures that Machine Specialty & Manufacturing's products meet strict technical, safety, and quality standards, providing customers with reliable and high-performance products.

"Achieving the API 6A certification is a significant milestone for our company," said Max Hutson, CEO of Machine Specialty & Manufacturing, Inc. "This certification confirms our dedication to producing high-quality products that meet the rigorous demands of the oil and natural gas industries."

Based in a 350,000-square-foot facility in Louisiana's Cajun country, Machine Specialty &

Manufacturing, Inc. is independently run and privately owned. The company specializes in high-pressure flanges and fittings and offers a wide range of products and services. These include API flanges and products, weldments, B16.9 weld fittings, specialty products, welding and fabrication, CRA/CRO weld cladding and overlay, non-destructive testing, hydrostatic testing, stress relief/PWHT, and repair and recertification.

For more detailed information on their product offerings and services, check their API flanges and products or learn more about their comprehensive non-destructive testing methods.

The company manufactures blind flanges that are specifically designed for the tough demands of the oil and natural gas industries. These flanges seal pipelines, valves, and pressure vessels, ensuring the safe and efficient operation of these systems. Made from materials like carbon steel, stainless steel, and alloy steel, MSM's blind flanges come in different weight options, including 15,000, 10,000, 5,000, 3,000, and 2,000 pounds.

Blind flanges are a crucial component in the oil and natural gas industries, which need reliable performance to avoid hazards and ensure smooth operations. MSM's products are designed to provide these essential features, helping to prevent leaks and maintain system integrity.

"Receiving the API 6A certification for our blind flanges reaffirms our position as a leader in manufacturing high-quality, high-pressure fittings," said Hutson. "It reflects our commitment to excellence and our goal to be a dependable partner to our clients."

In addition to blind flanges, MSM offers a variety of other products that meet industry standards. Their API flanges and products aim to improve the time and cost efficiency of installing, operating, and maintaining systems. MSM's weldments, which involve parts welded together, and B16.9 weld fittings, used in piping systems to change flow direction or connect pipes of different sizes, are also key offerings.

Machine Specialty & Manufacturing, Inc.'s focus on quality extends to their other services as well. These include high-pressure welding with certified procedures, CRA/CRO weld cladding and overlay services that protect products from corrosion, and extensive non-destructive testing methods such as ultrasonic testing and magnetic particle inspection. The company also provides hydrostatic testing up to 30,000 PSI and stress relief/post-weld heat treatment services with many certified ovens on site.

Additionally, MSM offers repair and recertification services for equipment like BOP, Valve, Spool, and other API 6A and 16A items. These services restore equipment to 'as new' condition at a fraction of the replacement cost, offering a cost-effective solution for clients.

Earning the API 6A certification for blind flanges demonstrates Machine Specialty & Manufacturing, Inc.'s continued commitment to producing high-quality products that meet the demanding standards of the oil and natural gas industries. This achievement highlights the company's dedication to excellence in every aspect of its operations, from manufacturing processes to customer service.
