Cool Blew Inc. Expands Top-Rated Phoenix AC Repair Services to Meet Growing Demand

February 18, 2025

Peoria, AZ - February 18, 2025 - PRESSADVANTAGE -

Cool Blew Inc., an HVAC repair company based in Peoria, Arizona, has announced the expansion of its Phoenix AC repair services. The family-owned business, which handles heating, cooling, plumbing, and solar services, has expanded its reach to better serve the Phoenix area.

Since starting in 2002, Cool Blew has earned a reputation for reliable and efficient service. With this expansion, the company aims to offer timely and expert air conditioning repairs to homeowners and businesses in Phoenix and the surrounding areas.

"Our goal has always been to meet our customer's needs with the highest standard of service," said Scott Proctor, Operations Manager at Cool Blew Inc. "By expanding our AC repair services in Phoenix, we are ensuring that more residents can rely on our expertise during the hot summer months."

The expanded service area not only includes Phoenix but also neighboring cities such as Glendale, Scottsdale, Mesa, and Tempe. This move responds to the growing demand for quality air conditioning repairs, especially as temperatures continue to rise each year.

Besides Phoenix AC repair, Cool Blew Inc. offers a wide range of services. For air conditioning, they provide repair and installation services for both homes and businesses. They also maintain evaporative coolers and refrigeration units. Their heating services include routine maintenance and emergency repairs, ensuring people stay warm during winter.

The company also takes care of plumbing needs. They offer water heater installations, sewer and drain cleaning, and garbage disposal repairs. For those looking to reduce energy use, Cool Blew installs solar panels. They also provide solar attic fans, solar PV, and solar thermal systems.

"We understand the importance of dependable HVAC systems, especially in Arizona's heat," Proctor said. "Our team of certified technicians is dedicated to ensuring every system runs efficiently, helping customers stay comfortable."

Cool Blew Inc. also offers preventative maintenance agreements. These agreements aim to prolong the life of HVAC units while reducing repair costs. The service plans include regular check-ups and timely adjustments to keep systems running smoothly.

Customers wanting to improve their home's energy efficiency can benefit from the company's insulation, duct sealing, and KVAR services. These services aim to lower energy use and reduce utility bills. Additionally, Cool Blew's financing options make it easier for homeowners to afford necessary repairs and upgrades without financial stress.

As a factory-authorized dealer for several reputable brands, Cool Blew Inc. installs only high-quality products in homes and businesses. They offer various HVAC products, including advanced Honeywell thermostats and indoor air quality items like the Air Scrubber Plus.

It is also noteworthy that Cool Blew Inc. actively uses ActivePure technology, effective against RNA viruses such as COVID-19. This feature underscores the company's commitment to providing safe and healthy indoor environments for their customers.

"We aim to be more than just a service provider; we want to be a reliable partner in our customers' comfort and safety," Proctor added.

With nearly two decades of experience, Cool Blew Inc.'s NATE certified, SRP certified, and APS qualified technicians continue to uphold the company's commitment to quality service. The company maintains a blog and a social media presence on platforms like Facebook and Twitter, providing valuable information and updates about their services.

For more information about Cool Blew Inc.'s expanded Phoenix AC repair services or to schedule a service, residents can visit the company's website. The company's ongoing efforts to expand and improve its services show a commitment to meeting the evolving needs of its customers in Phoenix and beyond.
