Dr. David F. Skanchy Joins Pediatric Eye Specialists, Expanding Access to Specialized Pediatric Eye Care

September 26, 2024

Fort Worth, Texas - September 26, 2024 -
Pediatric Eye Specialists is excited to announce the arrival of Dr. David F. Skanchy, a highly accomplished pediatric ophthalmologist, to their team. Dr. Skanchy brings a wealth of expertise in pediatric ophthalmology and adult strabismus, offering a broad range of services to treat various pediatric eye disorders. His addition represents a significant step forward for the practice, allowing Pediatric Eye Specialists to meet the growing demand for pediatric eye care in the region.

Dr. Skanchy's impressive academic and professional journey reflects his commitment to both medical excellence and compassionate patient care. Born in Philadelphia, Pennsylvania, and raised in Salt Lake City, Utah, Dr. Skanchy pursued his undergraduate education at Brigham Young University, where he was awarded a full academic scholarship. Graduating summa cum laude, he demonstrated early on a dedication to academic rigor that would carry through his medical training. Dr. Skanchy earned his medical degree from the University of Texas Health Science Center at Houston, where he was recognized as a top student, receiving the prestigious Dean?s Competitive Scholarship for all four years and being inducted into the Alpha Omega Alpha national medical honor society.

Dr. Skanchy?s residency in ophthalmology, followed by a fellowship in pediatric ophthalmology and adult strabismus, took place at the renowned Kellogg Eye Center at the University of Michigan. His time at Kellogg was marked by leadership and teaching excellence, as he served as chief resident and later as a clinical instructor. In this role, he was instrumental in training future ophthalmologists in cataract surgery, pediatric ophthalmology, and ocular trauma. His passion for medical education is evident not only in his teaching but also in his scholarly contributions, having published in multiple peer-reviewed journals. His dedication to improving medical education and patient care aligns perfectly with the mission of Pediatric Eye Specialists.

In addition to his impressive credentials, Dr. Skanchy has demonstrated a strong commitment to serving underprivileged communities. He has volunteered his time and expertise with charitable organizations in Mexico, the Navajo Nation, Texas, and Michigan, providing much-needed eye care to patients who otherwise might not have access to it. This deep sense of service is a key component of his approach to patient care,

ensuring that every child and adult he treats receives the same high level of care, regardless of their background.

?We are proud to add Dr. Skanchy to our team,? said Dr. Eric Packwood, cofounder of Pediatric Eye Specialists. ?His addition allows us to see more children and provide care for even more complex cases. His dedication to both his craft and his patients is unparalleled, and we are excited to continue growing our practice with him on board.?

Dr. Skanchy?s areas of expertise include the treatment of complex pediatric and adult strabismus, amblyopia, childhood cataracts, ocular trauma, and retinopathy of prematurity. His specialized knowledge in these areas makes him a valuable asset not only to Pediatric Eye Specialists but also to the families and communities they serve. With his extensive training and compassionate approach, Dr. Skanchy is uniquely equipped to handle even the most challenging cases, providing comprehensive and individualized care for each patient.

His addition comes at a time when Pediatric Eye Specialists is seeing an increased demand for pediatric ophthalmic services. Strabismus, amblyopia (commonly known as lazy eye), and other pediatric eye disorders require early diagnosis and treatment to ensure optimal outcomes for children. Dr. Skanchy?s arrival means shorter wait times for appointments and more opportunities for patients to receive timely care. His expertise in the treatment of retinopathy of prematurity, a serious eye condition affecting premature infants, is particularly important for the region, where access to such specialized care has been limited.

Pediatric Eye Specialists has long been known for its dedication to providing high-quality, specialized care for children with eye conditions. With the addition of Dr. Skanchy, the practice is well-positioned to continue that legacy and expand its reach. The practice?s focus on comprehensive eye care ensures that every patient, from infants to adults, receives the highest standard of treatment. Dr. Skanchy?s philosophy aligns seamlessly with this mission, as he emphasizes the importance of personalized care tailored to each patient?s unique needs.

Families in the region can expect to benefit from the full scope of services offered by Dr. Skanchy and the team at Pediatric Eye Specialists. Whether it?s early detection and treatment of pediatric eye conditions, surgical interventions for strabismus, or follow-up care for complex cases, the practice provides a welcoming environment where children and their families can feel confident in the care they receive.

With his impressive background and passion for helping others, Dr. Skanchy is set to make a significant impact not only within the practice but also in the broader community. His ability to connect with patients, combined with his clinical expertise, makes him a valuable resource for families seeking pediatric eye care solutions. As Pediatric Eye Specialists continues to grow and serve the community, Dr. Skanchy?s contributions will undoubtedly play a key role in the practice?s ongoing success.

For more information or to schedule an appointment with Dr. Skanchy, please visit the Pediatric Eye Specialists website or contact the office directly.
