

Acorn Tuckpointing and Masonry Restoration

Acorn Tuckpointing & Masonry Restoration Announces Eco-Friendly Tuckpointing Techniques in Greater Chicago Expansion

September 25, 2024

September 25, 2024 - PRESSADVANTAGE -

Acorn Tuckpointing & Masonry Restoration, a well-regarded provider of comprehensive masonry services in the Greater Chicago Area, is excited to announce the expansion of its offerings. Starting this fall, the company will use eco-friendly materials and techniques for all its masonry and tuckpointing projects. This new initiative shows the company's commitment to sustainability, adding to its reputation for quality work.

Acorn Tuckpointing & Masonry Restoration is a third-generation family business that has been offering masonry repair services since 1952. They are fully licensed and insured and hold an A+ rating from the Better Business Bureau. Their services include tuckpointing, chimney repair, caulking and grinding, chemical cleaning, lintel replacement, waterproofing, and parapet wall rebuilds and repairs.

For more information about their tuckpointing services, visit their website.

Chester, the company's chief executive, shared his thoughts on using eco-friendly materials. "Our team has always focused on quality and craftsmanship. By using sustainable materials, we are not just improving our services, but also helping the environment. Our clients can enjoy the same high level of work while making a greener choice."

Tuckpointing involves filling joints in masonry to stop water from getting in, which is key to keeping structures sound. The company's masonry services include building, conservation, and repair, serving residential, commercial, industrial, and institutional projects. Now, eco-friendly materials will be part of these services, ensuring long-lasting strength and environmental responsibility. Additionally, learn more about their comprehensive lintel replacement services today.

A major update in their services is the introduction of green tuckpointing solutions. These new solutions use sustainable materials without weakening the repairs. Chemical cleaning, another important service, will now use eco-friendly agents that clean just as well but are better for the environment.

Chimney repair is another field where Acorn Tuckpointing & Masonry Restoration is known for their expertise. Their chimney repair services range from minor fixes to complete rebuilds. Using eco-friendly materials in these projects will lower the environmental impact of the services provided. Clients can trust that their repairs are done by experts and are also kinder to the planet. For detailed information on their chimney repair services, visit their website.

The company's caulking and grinding services, essential for structural integrity, will also use new sustainable materials. The same goes for lintel replacements, where the company will use durable, eco-friendly horizontal supports. Waterproofing and parapet wall rebuilds and repairs are other areas where these new materials will be used, ensuring the structures are long-lasting and eco-friendly.

"Our goal is to combine sustainability with the high standards our clients expect from us," said Chester from Acorn Tuckpointing & Restoration. "By integrating eco-friendly materials into our masonry and tuckpointing services, we keep our promise of quality while also stepping up our environmental responsibility."

Acorn Tuckpointing & Masonry Restoration will continue to offer its full range of services, from masonry repair to chimney repair, with these new eco-friendly options. This move shows the company's dedication to its customers and the environment.

For more information about the new eco-friendly materials and techniques or to request a quote, you can visit the company's website. By adopting these new practices, Acorn Tuckpointing & Masonry Restoration sets a strong example in providing sustainable, reliable masonry and tuckpointing services in the Greater

Chicago Area. The company remains dedicated to delivering high-quality, expert services that meet the changing needs of its clients and the environment.

To learn more about Acorn Tuckpointing & Restoration and its wide range of services, visit their website. The expanded service offering will be fully in place by the fall, reinforcing the company's role as a provider of exceptional and sustainable masonry services.
