APACS Partners with Magnetic Trading to Enhance Warehousing and Repair Services Across the Asia Pacific Region

September 25, 2024

September 25, 2024 - PRESSADVANTAGE -

Asia Pacific Aircraft Component Services (APACS), a leading OEM-licensed repair shop specializing in aircraft component maintenance, repair, and overhaul (MRO) services, is excited to announce a strategic partnership with Magnetic Trading. This collaboration marks a significant development in APACS's service offering, enabling the company to provide comprehensive warehousing solutions and high-quality component repairs to support Magnetic Trading's growing operations in the Asia Pacific region. This partnership aligns with both companies' goals to expand their footprint in the region and deliver industry-leading services to customers.

Under this agreement, APACS will utilize its extensive industry experience and technical expertise to offer first-class repair services and efficient warehousing solutions to Magnetic Trading's clients. The partnership allows Magnetic Trading to streamline its operational workflow, reduce turnaround times, and ultimately enhance the quality of service for its customers. By providing 24/7 shipping capabilities, the collaboration ensures faster and more reliable delivery of components, further minimizing costly aircraft downtime and improving service efficiency.

This partnership exemplifies the strength of APACS's commitment to operational excellence and customer satisfaction. APACS's well-established infrastructure, combined with Magnetic Trading's global reach and expertise, creates a formidable service platform capable of meeting the increasingly complex demands of the aviation sector.

Key Highlights of the Partnership:

? Comprehensive Warehousing Services: APACS will manage inventory and warehousing for Magnetic Trading, optimizing storage solutions to ensure that critical components are readily available and accessible when needed. This will allow for quicker distribution, enhancing overall operational efficiency.

? Component Repair Services: Utilizing state-of-the-art diagnostic tools and repair capabilities, APACS will provide Magnetic Trading with high-quality repair services, adhering to the highest industry standards and ensuring compliance with regulatory requirements. The range of services includes repairs on components for major aircraft models such as Airbus and Boeing.

? 24/7 Shipping Capabilities: To support Magnetic Trading's expanding customer base in the Asia Pacific region, APACS will provide round-the-clock shipping services. This will ensure the timely delivery of essential components, which is critical for reducing aircraft on ground (AOG) situations and maintaining smooth operations.

? Regional Expansion: The partnership represents a crucial step in Magnetic Trading's strategy to increase its presence in the Asia Pacific region. With the support of APACS's advanced capabilities, Magnetic Trading will be better positioned to meet the needs of regional airlines and MRO providers, offering improved reliability, speed, and service quality.

?We are thrilled to partner with Magnetic Trading, a company that shares our dedication to quality and service,? said Martin Urwyler, Managing Director of APACS. ?This collaboration allows us to expand our service offering and support Magnetic Trading's ambitious growth plans in the Asia Pacific region. Together, we will deliver enhanced value to our customers by providing high-quality, reliable services when they need them most.?

Airina Kacienaitė-Krake, Head of Magnetic Trading, commented, "Partnering with APACS is a significant milestone in our regional growth strategy. Their impressive repair capabilities, extensive warehousing infrastructure, and commitment to service excellence perfectly align with our goals. By leveraging APACS's strengths, we are confident that we will be able to provide superior service to our customers in the Asia Pacific region and beyond."

This partnership between APACS and Magnetic Trading takes effect immediately, with both companies committed to delivering exceptional service and support to their aviation customers. The collaboration positions both organizations as leaders in the aviation component services market, particularly in the fast-growing Asia Pacific region.

About Asia Pacific Aircraft Component Services

Asia Pacific Aircraft Component Services Sdn. Bhd. (APACS) is a leading service provider in the Asia Pacific region for the maintenance, repair, and overhaul of aircraft components. Located in Shah Alam, Malaysia, APACS operates a state-of-the-art 90,000 square foot facility equipped with advanced test stands for Hydraulic, Pneumatic, and Fuel components. The company's extensive repair capabilities cover over 600 part numbers, including components for major aircraft such as the Airbus A320, A330, Boeing 737, and engines like the CFM56 and PW4000. In addition to repairs, APACS offers advance exchange programs to ensure that components are readily available for AOG or critical situations.

Committed to delivering high-quality services, APACS continues to develop new capabilities and adopt lean operational practices to ensure excellence in every aspect of its business.
