

Above All Masonry Enhances Long Island Yards with New Low-Voltage Landscape Lighting Services

September 27, 2024

September 27, 2024 - PRESSADVANTAGE -

Above All Masonry Design, Inc. has announced the addition of low-voltage landscape lighting to their list of services. This new offering will be available for all existing landscaped yards as well as new masonry projects, further enhancing the outdoor living spaces they are known for transforming.

Stephen Bono, CEO of Above All Masonry Design, made a statement on the new service. "We've seen a growing interest in outdoor lighting solutions as homeowners look for ways to extend their living spaces beyond the walls of their homes. By offering low voltage landscape lighting, we can provide a safer, more energy-efficient option for illuminating these areas."

The new lighting option aims to highlight the beauty of outdoor spaces while providing practicality and safety. Low-voltage lights consume less energy and produce less heat compared to traditional lighting, making them both cost-effective and environmentally friendly. These lights can be used to accentuate garden features, illuminate pathways, and add ambiance to patios and outdoor kitchens.

Above All Masonry Design has always focused on personalized services, and the new landscape lighting is no exception. Clients can expect custom lighting design and installation tailored to their specific needs and preferences. From the initial planning session to the final installation, the company ensures attention to detail and quality workmanship.

Adding low-voltage landscape lighting is a natural extension of the company's landscape design services. Above All Masonry Design already excels in transforming outdoor spaces with their hardscaping and softscaping expertise. This new service will allow them to add another layer of enhancement to their projects, creating visually appealing and functional outdoor environments.

Stephen Bono shared his excitement about the new service. "Offering low voltage landscape lighting aligns perfectly with our mission to create sustainable and beautiful outdoor spaces. We know that well-placed lighting can drastically change the feel of an outdoor area, making it more inviting and usable after dark."

Clients interested in incorporating this new lighting option into their existing landscapes or new projects can look forward to a range of design possibilities. Above All Masonry Design focuses on integrating lighting in ways that complement the natural beauty of the space while ensuring safety and functionality.

For example, garden lights can be used to highlight specific plants or trees, creating focal points in the landscape. Pathway lighting can ensure safe navigation around the yard during the nighttime. Patios and outdoor kitchens can be enhanced with ambient lighting, making these areas more enjoyable during evening gatherings.

In addition to their latest service, Above All Masonry Design offers a comprehensive range of outdoor living solutions. Their expertise spans landscape design, patio construction, outdoor kitchen creation, and much more. Each project aims to meet the specific aesthetic and functional goals of the client, ensuring satisfaction with the end result.
