

## International Credential Evaluation Services Launched

*January 22, 2016*

January 22, 2016 - PRESSADVANTAGE -

Word Communication International, a business in Phoenix, AZ, is proud to announce that they now offer a foreign education credit evaluation service through their website. These services are proving to be invaluable for employees and employers alike, particularly for those who have studied abroad. The foreign educational document service is already proving to be very popular.

Herman Lincoln from Word Communication International says: "Our service has been designed to help people prove that the education they have received abroad is valid in this country as well. It can also be used by employers who want to hire someone who has studied in other countries. We are happy to provide this important service to the community."

Word Communication International now offers several academic credential options for international degree evaluations. Their qualified education evaluators help clients who have completed part or all of their education outside of the United States. An accurate scholastic credential evaluation will assist people in obtaining employment as teachers, engineers, accountants and other occupations or furthering education in the United States.

In addition, the academic evaluation services have to do with more than simply matching them to their US

equivalent. The company also recommends products, services and programs that help people with a foreign education to further their academic career in this country. These services are designed to ensure that people can get the most out of their career.

The services offered by Word Communication International have been very positively received by their many clients. "I spent years studying in India and in the United Kingdom," says Amid Raiza. "I then decided to move to the United States after I had found a really good job. Proving that my education was valid, however, was a real hassle. Luckily, I came across Word Communication International and they were quickly able to match my degrees to the US equivalent. And they told me about further courses I could take once I emigrated. I can't recommend them enough."

People are encouraged to order a foreign credit evaluation through the Word Communication International website, which will enable them to demonstrate their level of education once they are in this country.
