Dr. Belinda Starkey Leads New Cosmetic Eye Services at Parenti-Morris Eyecare

November 08, 2024

November 08, 2024 -

Rogers, AR ? Parenti-Morris Eyecare proudly announces the launch of their new suite of cosmetic eye services, expanding their offerings to include advanced aesthetic treatments aimed at rejuvenating the delicate eye area. Under the leadership of Dr. Belinda Starkey, the new services are designed to meet the growing demand for non-invasive cosmetic solutions while maintaining the exceptional level of care Parenti-Morris Eyecare is known for.

?These new services offer tremendous benefits for our patients,? said Dr. Belinda Starkey, O.D. ?By integrating these aesthetic treatments, we can enhance our patients' overall well-being. Our goal is to provide options that not only improve appearance but also offer practical, long-term results in skin health and rejuvenation. This launch reflects our commitment to evolving with our patients' needs, offering them the latest in cosmetic eye care.?

Among the new aesthetic treatments is Morpheus8, a cutting-edge technology that tightens and lifts the skin through radiofrequency microneedling, stimulating collagen production for smoother, younger-looking skin. Forma-I, another addition, offers a non-invasive solution to tone and refresh the delicate skin around the

eyes, reducing puffiness and promoting a more youthful appearance.

In addition to these, the clinic offers treatments that have overlap with eye health condition treatments, especially dry eye syndrome. For instance, Intense Pulsed Light (IPL) therapy serves a dual function: it promotes skin rejuvenation and can smooth wrinkles, but it also provides important relief for dry eye symptoms by improving tear production and reducing inflammation. These treatments bring together the best of both worlds—cosmetic improvement and therapeutic care—for patients seeking comprehensive solutions.

Dr. Starkey and her team are dedicated to helping individuals look and feel their best, with a special emphasis on eye rejuvenation and overall facial aesthetics. By incorporating these aesthetic services into their already extensive offerings, Parenti-Morris Eyecare solidifies its position as a leader in holistic, comprehensive eye care. Their team is known throughout the community for going above and beyond for their patients' needs, and this new service palette reinforces their team's commitment to pushing boundaries.

Each of these treatments is performed using state-of-the-art equipment in a comfortable, welcoming environment. Patients will receive custom instructions and guidance through personalized consultations to discuss their specific concerns and desired outcomes. The team at Parenti-Morris Eyecare works closely with patients to ensure that every treatment plan is customized to meet both aesthetic and health-related needs.

Parenti-Morris Eyecare's new cosmetic services cater to a wide range of patients, whether they are looking to address fine lines, wrinkles, or sagging skin around the eyes. These treatments are ideal for those who want to refresh their appearance without undergoing more invasive surgical procedures. Patients can now benefit from results that are not only immediate but also improve over time as the body's natural healing processes are stimulated.

For more information or to schedule a consultation for the new aesthetic services, patients are encouraged to contact Parenti-Morris Eyecare. Appointments can be made by phone at (479) 339-4577 or on their website at <https://www.parentimorris.com/>.
