Advanced Industrial Embraces Thanksgiving with Facility Closure to Honor Employee Dedication

November 14, 2024

MOORESVILLE, NC - November 14, 2024 -
Advanced Industrial has announced that it will close its facilities on Thanksgiving Day this year, allowing employees to spend time with their families and loved ones. Operations will pick back up on the Friday following Thanksgiving, with the company returning to its regular schedule.

This decision shows Advanced Industrial's commitment to appreciating the hard work and dedication of its employees. Founded in 1995, the company is well-known for distributing and fabricating high-performance plastic shapes and CNC machined components. They recognize how important it is for their staff to have a good work-life balance, giving them the chance to enjoy the holiday's traditions.

"Our employees are our greatest asset," said Paul Cedrone, the CEO of Advanced Industrial. "Giving them the chance to enjoy Thanksgiving Day with their families not only shows our appreciation for their valuable contributions but also highlights the family-centric values we uphold as an organization."

Advanced Industrial operates a modern 20,000 square-foot manufacturing facility in Mooresville, North Carolina. The company specializes in creating custom bearings, gears, and components using advanced

materials like Polyether Ether Ketone (PEEK) and Ertalyte. These substances are valued for their resistance to harsh chemicals and strong mechanical strength, which make them ideal for demanding applications.

With a varied portfolio that includes PEEK machined components and high-performance plastic shapes, the company has earned a reputation for solutions that meet and often exceed customer expectations. It continues to lead in manufacturing parts tailored to specific industry needs, using materials like PEEK and Ertalyte to ensure top-notch performance.

The staff at Advanced Industrial plays a key role in the company's success, using their skills to support precise manufacturing and customer-focused solutions. This high level of dedication allows the company to produce components that are safe and durable across various mechanical applications. More information about the company's capabilities can be found on their website: https://cncplastics.com/.

Apart from their manufacturing services, Advanced Industrial offers educational resources, such as eBooks, to help clients understand the use of high-performance plastics in different scenarios. Giving customers a thorough understanding of material properties helps them make the most out of the components in various industrial settings.

As they prepare for a brief pause in operations, Advanced Industrial remains committed to the values that are central to its workplace culture. "This Thanksgiving closure is not just about giving a day off," Cedrone added, "but it's also an expression of gratitude for our hardworking team. They deserve time to relax and enjoy the festivities."

The company views this holiday as an opportunity to highlight the importance of its workforce, personal time, and continuous dedication to quality manufacturing. This decision supports a balanced approach that considers both employee welfare and the company's business goals.

By closing for Thanksgiving, Advanced Industrial emphasizes its appreciation for those who work hard to maintain excellence and innovation in all its products. By prioritizing their employees, the company stands out as one that understands the need to balance personal well-being with professional duties.

For more detailed information about Advanced Industrial's products and services, including their expertise in high-performance plastic shapes and CNC machining, interested parties are encouraged to visit their website.

As Thanksgiving approaches, Advanced Industrial extends warm wishes to its staff and customers for a joyful

celebration. By taking a day to embrace gratitude, they reaffirm their commitment to creating a positive work environment and building lasting relationships with both employees and clients.
