

Grodworks Just Added The Best Projected Upcoming Films, Reviews and More

January 25, 2016

January 25, 2016 - PRESSADVANTAGE -

Grodworks now offers a Top 25 list for all movie years dating back to 2013 and a Top 10 list for all genres.

Grodworks is a very popular movie reviews and covers upcoming movie reviews website. The site has been running for almost two years, and tries to focus on the best movies for each year. A movie goer can quickly find the best movies from the website and know the films listed have been approved as great films. In the site, readers will find all kinds of movie reviews from many genres. Another feature of the site is that it always tries to focus on actual opinions of non-movie critics rather than critics. The company says that many movie critics look at different aspects of the film then the film as a whole, which in most cases can be misleading.

CEO Mr. Frank Ecker says that "Grodworks strives to be the best source for users to find all the best upcoming films." Grodworks also produces movie montages for the best films on YouTube.

Grodworks lets readers get access to reviews of the top 25 movies in 2015, as well as information about upcoming best movies. Genres such as horror, action, animated, comedy and chick flicks are covered on the site. Readers can also stay updated with Grodworks on their official Facebook page.
