

# Advantage Local Agency Now Providing Social Powered WIFI Hotspot Marketing

*January 19, 2016*

January 19, 2016 - PRESSADVANTAGE -

Advantage Local Agency is an online firm based in Atlanta. While specializing in SEO Optimization and internet marketing, the firm is now offering social powered WIFI hotspot marketing.

Innovation is the key when it comes to internet and online social media marketing. While the industry for internet marketing has grown tremendously in just a few years, there is always a competition in the industry for something new and better. Advantage Local Agency is an SEO and internet marketing firm based in Atlanta, Georgia; the firm is now providing a new service that they state to be more effective than commonplace online marketing methods. The company calls it "Social Powered WIFI Hotspot Marketing".

Catering to entrepreneurs, small businesses, professionals and corporations, the company has worked on a multitude of online marketing and SEO projects in the past.

"It's the perfect solution for our business. I would personally like to thank you [Advantage Local] for your outstanding product. Your web design services have completely surpassed our expectations," states one client in a testimonial of the web design services provided by Advantage Local Agency.

The service is fairly simple yet effective, explains the spokesperson for the company. Businesses provide their clients with a free WIFI hotspot to connect to on their mobile devices. Once the clients have connected to the hotspot, the system provided by Advantage Local Agency retrieves email information, making it easier for businesses to alert customers of future offers and products etc.

The Advantage Local spokesperson made an official press statement in which he discussed the company's work and the new service: "Clients can always expect to get the best service from us. We believe in prioritizing each and every one of our clients and giving them utmost customer support. While previously providing SEO, web design and internet marketing services to our clients, we are now also providing a social powered WIFI hotspot marketing service."

He further added, "With our new service, customers can stay in touch with their clients and increase their chance of getting repeat businesses. Our WIFI hotspot will help businesses retrieve email information from a customer's device when they login with the free hotspot, thus enabling businesses to send customized emails, offers and news to all of their clients."
