AP Precision Metals Inc. Unveils Enhanced Aluminum Busbar Storage to Boost Efficiency and Client Service

August 08, 2025

August 08, 2025 -

AP Precision Metals Inc., a leader in metal fabrication, has expanded its facilities by introducing new vertical covered storage for aluminum busbars. This new storage solution can hold up to 50 pallets of finished goods. It's meant to boost the company's efficiency, especially in keeping a well-organized inventory of high-volume components. This improvement provides the flexibility needed to adapt to changes in client delivery schedules and ensures that client needs are met on time. Learn more about their cutting-edge fabrication processes.

Joe, a representative from AP Precision Metals Inc., stated, "The addition of this vertical covered storage underscores our commitment to offering exceptional service to our clients. By maintaining an adequate safety stock, we can better respond to fluctuations in demand and adhere to our clients' delivery schedules without compromising quality or speed."

The company has earned its reputation by offering a wide range of metal solutions, from fabrication to quality assurance. Operating out of a modern 40,000 sq. ft. factory in San Diego, they specialize in various metal processing techniques. Their expertise, particularly in aluminum busbar manufacturing, consistently aligns

with industry standards for reliability and performance. Explore their capabilities in welding and finishing to understand the comprehensive solutions they provide.

Aluminum busbars are crucial in many applications due to their affordability, lightweight nature, good conductivity, and recyclability. AP Precision Metals supports its clients by processing over 75,000 lbs of aluminum busbars each month, adhering to strict maintenance and operational procedures.

To remain a top provider in metal fabrication, AP Precision Metals works with trusted regional suppliers for different finishes. Their production methods are built on high quality and efficiency, showcasing their dedication to superior engineering and production.

AP Precision Metals Inc. also continues to grow its network of plating suppliers, which helps them increase their finishing capacity. This expansion allows them to offer a wider range of finishing options and provide more customized solutions for clients.

"Flexibility is a cornerstone in our strategy," Joe continued. "We understand the intricate balance that today's industries require between robustness and adaptability. Our ongoing enhancements, including the vertical storage for finished goods, reinforce our pledge to remain a proactive partner in our clients' success."

The detailed craftsmanship evident in their busbars is matched by other specialized services like fabrication, cutting, welding, and assembly. These services are backed by a skilled team adept at using both manual and automated systems, which are designed to grow with business needs.

With over 20 years of experience, AP Precision Metals remains committed to serving mid-to-high volume domestic lean production markets, ensuring that their integrated manufacturing processes meet changing business demands. The company's ISO 9001:2015 certification also shows its commitment to high-quality standards and continuous process improvement.

AP Precision Metals invites businesses interested in utilizing their capabilities, especially regarding aluminum busbars and their extensive finishing solutions, to reach out. More details and quote requests can be made through their website, where potential clients can learn about their comprehensive services and certifications. The new pallet system for busbars underscores AP Precision Metals' dedication to innovation and client-focused service.

Based in San Diego, the company encourages interested parties to see how these new developments can meet both current and future business needs, reinforcing their role as a dependable partner in the metal

fabrication industry. For more information about their full-scale metal solutions, visit their website.
