

Go Industries Unveils New Winch Grille Guards for Chevy with Customization and Durability

January 14, 2025

Richardson, TX - January 14, 2025 -
Go Industries Inc., known for its cutting-edge products for trucks, law enforcement, and custom manufacturing, is rolling out its latest offering for truck lovers. The company has launched the new Winch Grille Guard System, which is a modular product designed to boost truck durability while allowing for unique customization. This gives vehicle owners the chance to tailor their trucks to their specific needs.

The Winch Grille Guard System is built tough, featuring 5/16" laser-cut steel uprights and 2.5" 16 gauge steel cross tubes. This solid construction ensures the system is highly durable and provides excellent protection for trucks. Its modular nature allows drivers to add a winch carrier and brush guards, making it a flexible solution that can be customized for different preferences and needs.

A standout aspect of the system is its compatibility with various vehicles, enabling owners to choose products that fit the specific make, model, and year of their truck. For Chevy owners, installing grille guards with winch capabilities means added protection and functionality. Similarly, brush guards for Ford with winch also offer

these benefits and integrate smoothly into the vehicle's build. All products come with custom mounting brackets that are built for heavy-duty use, ensuring strength and security for both daily driving and off-roading.

A spokesperson from Go Industries emphasizes, "Our new Winch Grille Guard System is all about giving truck owners high performance and flexibility. We understand our customers have different needs, and this product brings notable enhancements in both protection and versatility."

In addition to the grille guard system, Go Industries continues to offer its durable dually mud flaps. These are designed to protect trucks from debris, rocks, and mud and are suitable for all dually models like Chevrolet, Dodge Ram, Ford, and GMC trucks. Customers can customize by choosing options like the Classic Dually Set or the Stainless Steel Dually Set. These mud flaps do a great job of shielding vehicle exteriors in tough conditions, helping keep trucks looking good over time.

The spokesperson shares, "Our dually mud flaps provide essential protection for those with heavy-duty trucks. With top-notch materials and a functional design, truck owners can drive with confidence knowing their vehicles are shielded from harsh elements."

Go Industries prides itself on offering products that enhance vehicle protection and functionality. Customers will notice the rugged build quality and smooth operation of the new Winch Grille Guard System and our trusted dually mud flaps. To back their products, the company provides a three-year warranty covering materials, workmanship, and finish, which shows their dedication to reliability and customer satisfaction.

Dedicated to improving customer experience, Go Industries provides resources like detailed installation instructions, product catalogs, and warranty information right on their website. Customers can access full product specs and request quotes for custom manufacturing through the Go Industries online platform.
