Aegis Eyecare Launches Dry Eye PSA Campaign for 2025

January 08, 2025

January 08, 2025 -
Philadelphia, PA ? Aegis by Abraham Eye Associates is stepping into 2025 with a vision to combat Dry Eye Disease, launching an innovative PSA campaign designed to educate the public and highlight effective treatment options. The campaign emphasizes the practice?s cutting-edge approaches, including Intense Pulsed Light (IPL) and Radiofrequency (RF) therapies ? advanced methods designed to address the root causes of Dry Eye Disease and provide long-lasting relief.

?Dry Eye is a multifaceted condition that impacts millions of people,? said Dr. Mark Abraham, founder of Aegis by Abraham Eye Associates. ?This campaign is not just about awareness; it?s about equipping people with knowledge of effective treatments that can make a difference in their lives.?

The initiative highlights the growing prevalence of Dry Eye Disease, which affects individuals across all demographics. By focusing on advanced treatments like IPL and RF ? and intentionally steering clear of traditional options like LipiFlow ? Aegis aims to redefine how Dry Eye is managed, delivering solutions tailored to the needs of every patient.

Dry Eye Disease can result from various underlying causes, including environmental factors, screen time, medical conditions, and aging. The condition occurs when the eyes fail to produce enough tears or tears of poor quality, leading to redness, irritation, and blurred vision. Left untreated, it can severely impact quality of life and lead to long-term damage to the ocular surface.

Aegis Eyecare?s PSA campaign aims to empower patients with knowledge about their condition and the available advanced diagnostic and treatment options. ?Our goal is to help people understand that relief is not only possible but achievable with the right care plan,? added Dr. Abraham.

The campaign will showcase how IPL and RF therapies go beyond symptom management, targeting the underlying causes of Dry Eye Disease. These treatments work by stimulating the meibomian glands, reducing inflammation, and restoring a healthier tear film. Both are non-invasive and well-tolerated, offering patients a convenient and highly effective option for relief.

By leveraging state-of-the-art technologies and customizing treatment plans for each individual, Aegis Eyecare continues to push the boundaries of what is possible in Dry Eye management. The PSA campaign will include educational materials, patient success stories, and community outreach initiatives to raise awareness and foster understanding.

Since its founding in 2014, Aegis by Abraham Eye Associates has become a leader in advanced eye care, known for its innovative approaches to complex eye conditions. The practice?s patient-first philosophy and spa-like atmosphere ensure that everyone receives personalized, compassionate care.

?Our team is passionate about helping people achieve optimal eye health,? said Dr. Abraham. ?Through this campaign, we?re not just addressing a condition ? we?re changing lives.?

Aegis by Abraham Eye Associates invites patients and the community to participate in the 2025 Dry Eye Awareness campaign. To learn more about Dry Eye Disease and explore treatment options, visit the website or call 484-296-3499 to schedule a consultation.
