

Find Locations Near Me Launches Informational Website

January 21, 2016

January 21, 2016 - PRESSADVANTAGE -

Atlanta GA: Find Locations Near Me is pleased to announce the establishment of a website dedicated to helping browsers find points of interest near a particular location easily and quickly. The website offers nearby locations for categories such as fast foods, restaurants and other businesses which are likely to be of interest to local residents and visitors to the area alike. Categories such as pharmacies, hair and nail salons and others are represented in the database offered by the website.

Within the many categories of services, the website provides more detailed information. Hours of operation to specific businesses, descriptions of some menu items, and locations of stores and business sites are all included in the database. When it is appropriate, there are links to food sites which provide delivery services, as well as businesses which offer emergency services or 24-hour assistance to customers.

A number of apps are described and presented on the umbrella site. Finding fast food locations, movies, banks and ATM locations are a helpful feature of the website. Travelers can access the site where the extensive database is available to help with all the needs of a visitor to a new location. Whether the occasion for the visit is pleasure or business, the ability to access specific information about a location across the country makes pre-planning activities more convenient.

The website is not a ranking service, and the owners of the site have no ownership or financial interest in the businesses provided in the database. Maps permit a wide range of locations to be presented and identified for available services. Local residents can use the convenient website or use the information from mobile apps to locate the type of service which is needed. The maps also offer the opportunity to identify services for the out-of-area visitors who are in need of specific information.
