PES Adult Strabismus Center Offers Hope to Adults Across DFW

January 31, 2025

January 31, 2025 -
PES Adult Strabismus Center is transforming the lives of adults with strabismus in the Dallas-Fort Worth metroplex by providing specialized care at five convenient locations. With its main branch in Fort Worth and additional offices in Denton, Mansfield, Prosper, and Keller, the center is dedicated to addressing a condition that affects vision, confidence, and quality of life.

Strabismus, commonly referred to as crossed or misaligned eyes, occurs when the eyes fail to align properly. This condition impacts approximately 4% of adults, often leading to issues such as double vision, reduced depth perception, and social discomfort. Although many assume it?s a childhood condition, strabismus can develop or persist in adulthood due to neurological conditions, trauma, or untreated cases from earlier years. Recent studies highlight its profound effects on daily life, with individuals frequently reporting challenges in driving, reading, and maintaining interpersonal connections.

In an effort to bring much-needed awareness and accessible solutions to this under-recognized issue, PES Adult Strabismus Center has launched its innovative website, alignmyeyes.com. This state-of-the-art resource serves as a gateway for adults seeking effective treatment, offering detailed information about adult

strabismus, an interactive self-assessment tool, and comprehensive FAQs. The platform also debunks common myths, such as the misconception that strabismus is merely a cosmetic issue. In reality, untreated adult strabismus can lead to debilitating symptoms like headaches, poor depth perception, and difficulties in social or professional settings.

?Adult strabismus is often misunderstood,? said Dr. Michael G. Hunt. ?Many adults don?t realize that it?s a treatable condition or that it can have such a profound impact on their lives. Our new website is designed to dispel those myths and make it easier for patients to connect with the care they need.?

The website features success stories from patients whose lives have been transformed through treatment. These stories highlight how correcting strabismus can restore self-confidence, improve professional interactions, and enhance daily activities. The platform also offers a groundbreaking self-assessment quiz that empowers users to evaluate their symptoms and take the first step toward seeking professional care.

Led by a team of board-certified ophthalmologists with over 70 years of collective experience, the PES Adult Strabismus Center provides both surgical and non-surgical solutions. The team includes Eric A. Packwood, MD, MBA; Michael G. Hunt, MD; Dr. Alan A. Norman, MD, MBA; Dr. Sarah Madison Duff-Lynes, MD; and Dr. David F. Skanchy, MD. These specialists trained at top institutions such as Baylor College of Medicine, Washington University, Duke University, and the University of Michigan bringing unparalleled expertise to the practice.

Dr. Packwood emphasized the center?s commitment to individualized care, stating, ?Strabismus in adults isn?t just about appearance. It?s a condition that affects daily life, from vision to self-esteem. We?re here to restore function and hope, one patient at a time.?

Dr. Norman added, ?Many adults suffer in silence, unaware that highly effective treatments exist. At PES Adult Strabismus Center, we?re changing that narrative by offering comprehensive care tailored to each patient?s unique needs.?

With multiple locations in Fort Worth, Denton, Mansfield, Prosper, and Southlake, the PES Adult Strabismus Center ensures patients can access expert care without traveling far from home. Strabismus treatment is covered by health insurance. The practice accepts major insurance plans, Health Savings Accounts (HSAs), and Flexible Spending Accounts (FSAs), making treatment more accessible and affordable.

The new website, alignmyeyes.com, is designed to be a comprehensive resource, offering tools and information that empower patients to take control of their eye health. It also invites potential patients to take the Adult Strabismus Self-Test, an easy-to-use tool that helps individuals assess their symptoms and determine if they might benefit from treatment.

For reporters seeking more information, the PES Adult Strabismus Center?s medical team is available for interviews and expert commentary on topics related to adult strabismus. From advancements in surgical techniques to the psychological effects of untreated strabismus, the center?s specialists provide authoritative insights backed by decades of experience.

PES Adult Strabismus Center is redefining how adult strabismus is treated and perceived. With five strategically located offices, a world-class team of specialists, and a commitment to patient education, the center offers hope to adults struggling with eye misalignment.
