

European Coatings Inc. Unveils Royal Glaze Bathtub Paint Refinishing Supplies Revolutionizing the Industry

February 14, 2025

Wilmington, North Carolina - February 14, 2025 -

European Coatings Inc. has just rolled out a new set of Royal Glaze bathtub refinishing products. With over 40 years in the business, the company keeps innovating, focusing on products that dry faster and are better for the environment. Known for delivering high-quality solutions, European Coatings has been a reliable fixture in the bathtub reglazing world throughout the United States, helping various professional contractors and remodeling companies. For more about the company's comprehensive product lines and values, visit their website.

The new Tub Reglazing European Coatings Products dry completely in just 12 hours, and you don't need heat lamps. This fast drying time is a big plus for commercial clients like hotels and apartment buildings, as it reduces downtime and speeds up project completion. Being able to finish projects quickly keeps operations smooth and customers pleased.

Todd Schoen, a company representative, highlighted the brand's aim to mix high performance with

responsibility. He stated, "We are dedicated to developing products that not only enhance project outcomes but also demonstrate our commitment to the planet. Our eco-friendly formulations ensure minimal environmental impact while maintaining superior quality."

Sustainability is key in these new products from European Coatings. They promise a smooth, shiny finish that stands up well to chipping, peeling, and discoloration. These offerings fit well with the growing trend for eco-friendly solutions in home remodeling. This is important for customers who want both style and eco-friendliness in their projects. Those interested can learn more about the latest eco-friendly trends that align with European Coatings' commitments on their website.

Besides this new line, European Coatings offers a wide range of refinishing items. These include primers, top coats, etching agents, strippers, and cleaners, all designed with the latest technology. These products not only make bathrooms look better but also extend the life of fixtures, adding real value for contractors and future users alike.

The introduction of this eco-friendly line follows a larger industry move towards sustainable practices and materials. The bath and kitchen refinishing sector is a big part of the \$233 billion home remodeling market in the U.S. Innovations from European Coatings Bathtub Refinishing Supplies help contractors deliver top-notch projects efficiently.

The company also offers a variety of finishes to match any design preference, going beyond just functionality to meet aesthetic needs too. With such a wide product range, clients can customize their projects to fit their unique specifications, whether it's a complete hotel renovation or a small home improvement project.

Todd Schoen also mentioned, "Our role as a nationwide supplier allows us to work closely with contractors and modelers across the nation to deliver not just products, but promises of quality and reliability. We take pride in being a part of the transformative projects that our supplies help to execute every day."

European Coatings is committed to boosting the efficiency of professional contractors and remodeling firms. The company aims to support their objectives with versatile, high-performance products. By continuously pushing the limits of coating technology, European Coatings keeps a leading position in the bathtub refinishing supplies market.

The company backs its wide range of products with strong customer service, ensuring questions and requests are promptly addressed. With the growing interest in home renovation, European Coatings is ready to meet the market's changing needs. Offerings like Tub Reglazing European Coatings Products combine convenience, beauty, and sustainability.

Those looking to learn more about European Coatings Bathtub Refinishing Supplies and other new products should check out the company's website or contact their sales team for detailed information on how these products can meet specific project demands.
