

Grow With Us Expands to Crestview, Enhancing Childcare Opportunities in a New Community

February 21, 2025

Fort Walton Beach, Florida - February 21, 2025 -
Grow With Us Learning Academy is opening a brand-new location in Crestview, Florida. This adds to their existing sites in Navarre, Fort Walton Beach, Pace, and Pensacola. This new development is part of their effort to make high-quality childcare services more available to families in the area. Like its other locations, the Crestview branch will offer nursery, toddler, preschool, and Voluntary Prekindergarten (VPK), and after school programs.

By opening this new center, the academy aims to help more families take advantage of its diverse educational and developmental offerings. Their programs are designed with the belief that kids learn best when they're involved in engaging, hands-on activities. The academy focuses on meeting each child's needs to support their physical, mental, and emotional growth from a young age.

Emily Johns, Education Coordinator for Grow With Us Learning Academy, shared her excitement for the new location. "We are thrilled to bring our services to Crestview. This new location offers families in the area access to high-quality childcare and early education."

With the Crestview site soon to open, there are new career opportunities in childcare for local residents. More information about these opportunities can be found on their careers page. Emily mentioned, "Our expansion is not only about serving more families; it's about growing our team with passionate educators who share our commitment to nurturing young minds. We look forward to welcoming new staff who are enthusiastic, reassuring, creative, and positive."

For those interested in learning more about the new Crestview location and other programs, the academy encourages visiting their website or Facebook page. Families can find out more about available curriculums and resources that support their child's educational journey.

Grow With Us Learning Academy

We teach through age-appropriate activities while believing children learn best through hands-on experiences. All the while, we must remember that because children are different, they will all learn differently, and at different rates.
