Bristol Family Eyecare Partners with Avulux® to Offer Migraine Relief Lenses

February 04, 2025

February 04, 2025 -
Bee Cave, Georgetown, Lakeway-620 ? Bristol Family Eyecare is now offering Avulux® Migraine & Light Sensitivity Lenses, providing a non-pharmaceutical solution for those who experience persistent migraine-related light sensitivity (photophobia). With this partnership, patients at all three Bristol Family Eyecare locations can now access clinically proven relief through innovative lens technology designed to filter harmful light wavelengths while maintaining true color perception and visual clarity.

?Our mission at Bristol Family Eyecare is to provide the most advanced solutions to improve our patients? lives,? said Dr. Dan Bristol, founder of Bristol Family Eyecare. ?Migraines and light sensitivity can be debilitating, and many sufferers have limited options beyond medication. Avulux® lenses give patients a way to manage their symptoms effectively without relying on pharmaceuticals.?

Avulux® lenses use proprietary light-filtering technology to selectively block blue, red, and amber wavelengths, which are most commonly associated with triggering migraines. Scientific research supports their migraine-relief design. Unlike traditional tinted lenses, which can increase light sensitivity over time, Avulux® lenses offer a balanced approach, allowing beneficial light to pass through while minimizing discomfort and improving day-to-day functionality.

Light sensitivity, or photophobia, affects millions of migraine sufferers worldwide. Research indicates that exposure to specific wavelengths of light can worsen migraine symptoms or even trigger attacks. Avulux® lenses target this issue by filtering out harmful blue and amber light while allowing soothing, natural light to reach the eyes.

Unlike dark or heavily tinted lenses, which can contribute to increased light sensitivity over time, Avulux® lenses reduce photophobic discomfort while preserving natural color perception. These lenses allow wearers to comfortably engage in daily activities such as working on a computer, driving, or spending time in bright

environments without exacerbating their symptoms.

Bristol Family Eyecare is committed to staying at the forefront of patient care by offering leading-edge solutions for those suffering from chronic migraines and light sensitivity. The addition of Avulux® lenses reinforces this commitment by providing an innovative, non-invasive approach to migraine management.

?Many of our patients have struggled to find lasting relief from light sensitivity,? said Dr. Bristol. ?We are proud to offer a clinically backed solution that can make a meaningful difference in their lives. Avulux® lenses provide an effective, drug-free alternative that empowers patients to regain control over their symptoms.?

Avulux® Migraine & Light Sensitivity Lenses are now available at all three Bristol Family Eyecare locations in Bee Cave, Georgetown, and Lakeway-620. Patients interested in learning more can schedule a consultation with one of the practice?s eye care professionals to discuss whether these lenses are a good fit for their needs.

Those who suffer from chronic migraines and are searching for an alternative to medications or ineffective sunglasses may benefit from Avulux® lenses as part of a comprehensive migraine management plan.
