Dr. Mazen Iskandar Selected to Contribute to Prestigious Surgical Journal

February 10, 2025

Waxahachie, TX - February 10, 2025 -
Dr. Mazen Iskandar, a nationally recognized expert in complex hernia repair and founder of The Iskandar Complex Hernia Center, has been chosen to author two key chapters in Surgical Endoscopy and Other Interventional Techniques, the esteemed journal of the Society of American Gastrointestinal and Endoscopic Surgeons (SAGES) and the European Association for Endoscopic Surgery (EAES). His selection to contribute to this globally respected publication underscores his expertise in minimally invasive and robotic-assisted hernia repair, further establishing his role as a leading authority in the field.

As a peer-reviewed journal representing two of the most influential surgical organizations worldwide, Surgical Endoscopy and Other Interventional Techniques serves as a cornerstone for innovation in laparoscopic, robotic, and endoscopic surgery. It provides surgeons with the latest research, technical advancements, and evidence-based practices, shaping the future of surgical care. Contributing to this journal is a mark of distinction, granted only to those whose knowledge and contributions have a meaningful impact on the evolution of surgical techniques.

Dr. Iskandar?s contributions include two critical chapters aimed at refining laparoscopic and robotic-assisted

hernia surgery. His work in ?Port Type, Positions, and Number in Laparoscopic Ventral Hernia Repair? delves into the optimization of trocar placement, particularly in robotic surgery, where strategic placement enhances precision and improves patient outcomes. His second chapter, ?Management of Bowel Injury During Laparoscopic Ventral Incisional Hernia Repair,? provides a comprehensive review of best practices in identifying and managing bowel injuries during surgery. His discussion emphasizes that immediate recognition and repair are often possible, reducing the risk of complications and leading to better patient prognoses.

These contributions reflect Dr. Iskandar?s dedication to advancing the field through both clinical excellence and academic research. His reputation as a pioneer in complex hernia repair has earned The Iskandar Complex Hernia Center designation as one of only two Hernia Centers of Excellence in North Texas by the Surgical Review Corporation (SRC). This prestigious accreditation requires rigorous evaluation of patient outcomes, surgical protocols, and commitment to best practices. Additionally, Dr. Iskandar has been recognized as a Surgeon of Excellence in Hernia Surgery, a distinction granted only to a select group of specialists who demonstrate exceptional skill and adherence to the highest standards of patient care.

For patients seeking expert hernia treatment, Dr. Iskandar?s involvement in academic research and surgical innovation ensures access to the most advanced, minimally invasive techniques available. The adoption of robotic-assisted hernia repair and refined laparoscopic approaches has transformed patient outcomes, leading to faster recoveries, reduced post-operative discomfort, and lower complication rates. His contributions to Surgical Endoscopy and Other Interventional Techniques highlight his role in shaping the future of hernia surgery, ensuring that his patients benefit from the latest advancements in the field.

At The Iskandar Complex Hernia Center, patients receive state-of-the-art surgical care tailored to their individual needs. The center?s commitment to innovation, combined with Dr. Iskandar?s expertise, provides patients with access to cutting-edge treatment options designed to minimize downtime and optimize results. His ongoing contributions to surgical research and education reinforce his mission of providing the highest level of care to every patient who walks through his doors.

Dr. Iskandar?s selection as a contributing author to one of the world?s leading surgical journals serves as a testament to his expertise and dedication to the advancement of hernia surgery. His work continues to influence the field, equipping surgeons with the knowledge necessary to improve patient outcomes globally. As a recognized leader in hernia repair, his impact extends beyond his operating room, shaping the future of surgical care for both patients and the medical community at large.
