Florida Eye Specialists Expands to Palm Coast and Ormond Beach with the Acquisition of Two Leading Eye Care Practices

February 11, 2025

February 11, 2025 -
Florida Eye Specialists, one of the region?s most trusted names in ophthalmology, is expanding its presence to Palm Coast and Ormond Beach through the acquisition of Atlantic Eye Center and International Eye Associates. These locations will now operate as Florida Eye Specialists in Palm Coast and Florida Eye Specialists in Ormond Beach, ensuring continued excellence in eye care for local patients.

This integration consolidates two trusted practices into one, creating a unified network that delivers high-quality, patient-focused care. Patients in Palm Coast and Ormond Beach will continue to receive care from Dr. Kenzo Koike and Dr. Joanne Francis, both of whom bring years of experience and expertise in cataract surgery, glaucoma management, cornea care, and general ophthalmology.

?We?re thrilled to be able to expand our reach in the community with the rebranding of these locations,? said Dr. Rajesh K. Shetty, CEO and Managing Partner of Florida Eye Specialists. ?This change represents a step forward in providing more integrated, efficient care to the residents of Flagler and Volusia counties. By bringing these practices under one roof, we can offer more advanced technology and a wider range of services to our patients ? all closer to home.?

Dr. Shetty continued, ?This isn?t just about a name change; it?s about combining the history of excellent care provided by AEC and IEA with the cutting-edge resources and expertise that Florida Eye Specialists is known for. We are committed to enhancing the level of care available in Palm Coast and Ormond Beach and ensuring that patients have access to the latest treatments, technology, and a team of specialists dedicated to delivering outstanding outcomes.?

Florida Eye Specialists has long been a leader in advanced eye care, having performed over 100,000

cataract surgeries. The practice is renowned for offering cutting-edge treatments such as laser cataract surgery and the innovative Light Adjustable Lens (LAL).

The LAL, a breakthrough technology in cataract treatment, allows patients to fine-tune their vision post-surgery, offering a level of precision previously unavailable in traditional cataract surgery.

Additionally, the Palm Coast and Ormond Beach locations are now the only practices in the area offering both laser cataract surgery and the LAL.

This exclusive offering allows patients access to the latest advancements in vision correction, ensuring the best possible outcomes for those undergoing cataract procedures. By providing these innovative treatment options, Florida Eye Specialists continues to solidify its reputation as a trusted and comprehensive eye care provider in the region.

As the largest multi-specialty ophthalmology practice in Northeast Florida, Florida Eye Specialists also boasts a team of 20 top-tier specialists, many of whom are internationally recognized leaders in their fields.

From cataracts and glaucoma to retina care and oculoplastics, the breadth of expertise within the practice ensures that patients can receive specialized care for nearly any eye condition, all under one roof.

To schedule an appointment or learn more, patients can call (386) 446-9590.
