

All Out Inspired Launches New Website

January 27, 2016

January 27, 2016 - PRESSADVANTAGE -

All Out Inspired, a company that produces bicycle related accessories, is proud to announce that they have launched a brand new website. This is part of their efforts to establish themselves as a player on the big stage of accessories for used on bicycles. While the website is now live, people can also continue to obtain their products through the Amazon marketplace at <http://www.amazon.com/dp/B016R1RBYS>.

All Out Inspired's Andy M. says: "We have been selling through Amazon since our company first started and we are very happy with their service. We know our customers appreciate it as well, due to the enhanced security this platform offers. However, we also wanted to have our own shopfront, where we can interact directly with our customers and show them what we are all about. Our new website achieves that really well, and we must give a massive thumbs up to our design team for that."

The new website can be accessed through <http://alloutinspired.com/>. The various products marketed by the company listed on the site, with full details on what they do and how they work. In addition, the site also includes information about the company, testimonials and an opportunity to sign up to a newsletter.

Meanwhile, the products delivered by the company have been very positively received by their many clients. On the bike phone mount, for instance, nearly 100 positive reviews have been left in the short space of time

that it has been made available. "This Bike Phone Mount from All Out Inspired is very durable, built to last, and comes with a five year warranty," says Katherine H. "It is really very simple to install this phone mount on the handlebars without any special tools. The device is securely held in place by a snug-fitting adjustable clamp and a 4-point silicone strap. The clever ball-and-socket mount allows the user to make adjustments including swivel in any direction which ensures that the user has complete visibility of the device screen. The mount also has foam padded backing and side brackets that protect the device by absorbing the shocks and jostling around."

The company is looking forward to receiving many more positive reviews.
