

The Little Bamboo?s Bamboo Placemats Set of Four with Coasters Launches on Amazon

January 25, 2016

January 25, 2016 -

Sanford, FL - The Little Bamboo, a top seller on Amazon.com has released a new variation of their popular Bamboo Placemat set of four. This new variation not only in comes with four bamboo placemats, but it also includes four matching coasters.

This new variation was created based on requests from customers asking the company, The Little Bamboo if they had any coasters available with the placemat set. So, based on these frequent requests, The Little Bamboo decided to create a new product that included coasters with every purchase.

This makes it much easier for buyers to ensure that the coaster and the placemats match. The problem is many people buy placemats then have to buy coasters with another company and they do not match. Non-matching placemats and coasters do not look very appealing on a table setting.

?I love the fact that the placemats and the coasters come together in one package, it makes it so much more

convenient and they match and look great,? said Rose, a happy customer.

These new bamboo placemats set of 4 are made from all natural bamboo with a black fabric boarder. The natural bamboo color has proven to be very popular due to the fact that it easily matches many different decors due to the neutral color. The bamboo placemats also have a mesh backing to help prevent any spills from going onto the table.

?We are very excited about our new release that includes coasters with the bamboo placemats. We saw a need in the marketplace and wanted to provide the solution to our buyers. So far, the response has been great,? said Monika, a company representative.

The Little Bamboo specializes in all bamboo related products from bamboo charcoal soap, bamboo fiber socks, as well as bamboo placemats. The Little Bamboo and the new release of their bamboo placemats with coasters can be found on Amazon.com
