IV Solution & Ketamine Centers of Chicago Expands Fibromyalgia Management with Innovative Solutions

March 18, 2025

CHICAGO, IL - March 18, 2025 -
IV Solution & Ketamine Centers of Chicago is now offering more services to help people who are dealing with mental health issues and chronic pain. The clinic is well-known for its intravenous ketamine treatments, and now it's adding new options, such as Stellate Ganglion Block (SGB) and NAD+ Therapy. These treatments are designed for conditions like anxiety, PTSD, fibromyalgia, OCD, and depression that doesn't get better with regular treatment.

A significant new option is the Stellate Ganglion Block (SGB), focusing on easing PTSD symptoms. This involves a precise injection that helps block nerve signals causing PTSD symptoms. This shows the clinic's dedication to using current methods in mental health treatment.

Another new addition is the NAD+ Therapy. This treatment aims to improve brain function and clear thinking. By using a cellular coenzyme, it hopes to boost memory and focus, which can be really helpful for people battling with these challenging symptoms every day.

Dr. Bal Nandra emphasized these advancements by saying, "Our goal is to provide the best in mental health care solutions. The addition of SGB and NAD+ Therapy is a reflection of our commitment to utilizing cutting-edge treatments that are both safe and effective."

To make treatments more accessible, the clinic has teamed up with CareCredit. This partnership offers financing options for those who may have financial difficulties, showing the clinic's aim to help as many patients as possible get the care they need.

The clinic has also boosted its patient experience by expanding its resources. Now, patients can easily find information about different therapies, read testimonials, check FAQs, and download the forms they need on the clinic's website at ivsolutioncenters.com. This helps ensure patients are well-informed and ready for their treatments.

A media story highlights what IV Solution & Ketamine Centers of Chicago is doing for fibromyalgia management. Using clinically proven therapy for chronic pain, the clinic stays at the forefront of creating new solutions for a wide range of conditions. Their online presence, on platforms like Instagram and YouTube, helps spread the word about their services and patient experiences.

"Our patients' well-being is at the forefront of our mission," notes a clinic representative. "We are thrilled about expanding our services and deeply committed to making a positive impact on the lives of individuals dealing with chronic and complex health issues."

The clinic's efforts are recognized by the community, as seen through high ratings and positive feedback on their Facebook page. Patients often compliment the caring approach and the effectiveness of the treatments they receive.

IV Solution & Ketamine Centers of Chicago is constantly growing its offerings and resources, ensuring that people have access to therapeutic options that are not only innovative but also backed by clinical proof.

For anyone interested in these expanded services - as well as more details in their media story - more information can be found on the clinic's website. They are also active on social media platforms like Instagram and their YouTube channel, where they provide updates and share valuable content.

Through these ongoing efforts, the clinic is extending its reach across Chicago and beyond, offering hope and recovery options to those struggling with challenging mental health issues and chronic pain.
