

Bottle Service In Las Vegas To Be Launched On New Website Section

January 28, 2016

January 28, 2016 -

Surreal LLC has announced that they have hired Innov8tek to do a complete redesign of the Las Vegas section of their website. They expect the work to be completed towards the middle of February. The new site section will feature detailed club, pool and entertainment club pages, and also wholesale hotels, packages, shows and much more. The Surrealnightlife website is already attracting a lot of interest.

Brian from Surreal LLC says: "Las Vegas is truly a city that never sleeps. There are always things to do, as it offers something for everybody. We want to make sure people never miss out on their favorite show and can book not just tickets but also their preferred seat. Innov8tek has really listened to our brief and we can't wait to launch the new section of our website."

The website section will also feature numerous events. This will be fed by a partnership with UR Venue. Through the new website, people will be able to access interactive table maps ticketing for all available events. This page will always be up to date and will showcase events for every club and pool in Las Vegas.

Innov8tek | Success Through Technology has been very happy to take on this mammoth task of creating

something unique and interactive. "We believe in success through technology," says a representative of the company. "When we were approached by Surreal LLC, we knew straight away that we could do something really cool with this one. We offer a full service digital marketing package and we have really gone to town on this part of their website. We have aimed to create something that is both an information point and a ticket booking service and we're sure people are going to love it."

As stated, Surreal LLC has partnered up with UR Venue for the ticket booking element of their new site section. UR Venue is a very powerful and robust customer relations management system that has been used by various other venues and ticket offices. They look forward to a lengthy partnership with Surreal LLC and are ready to be launched.
