Dr. Demetris Stavrou Expands Rhinoplasty Services at European Institute of Plastic Surgery in Limassol

March 07, 2025

Nicosia, Cyprus - March 07, 2025 -
Limassol, Cyprus ? The European Institute of Plastic Surgery (EIPS), led by Dr Demetris Stavrou, is enhancing its presence in Limassol with its expert rhinoplasty services, catering to patients seeking aesthetic and functional nose surgery. As one of the most advanced procedures in plastic surgery, rhinoplasty requires precision, expertise, and an artistic eye?qualities that define Dr. Stavrou?s approach.

Rhinoplasty, commonly called a nose job, is a surgical procedure designed to reshape and refine the nose, improving its appearance and functionality. While some patients seek rhinoplasty for aesthetic reasons, others require it to correct breathing difficulties caused by structural issues such as a deviated septum. The European Institute of Plastic Surgery has built a reputation for excellence in delivering natural and harmonious results tailored to each patient's unique facial features.

A board-certified plastic surgeon, Dr. Stavrou has extensive experience performing rhinoplasty procedures and is known for his meticulous attention to detail. Having trained at top medical institutions in Greece, London, Melbourne, and Israel, he employs the latest surgical techniques to ensure optimal outcomes with minimal downtime. His experience spans thousands of plastic surgery procedures, encompassing all

cosmetic and reconstructive surgery aspects. Limassol's expansion of rhinoplasty services reflects a commitment to meeting the growing demand for advanced facial plastic surgery in Cyprus and beyond.

Dr. Stavrou emphasised the commitment to excellence, stating that the European Institute of Plastic Surgery is proud to offer high-quality rhinoplasty services at its Limassol location. Dr Stavrou explained that rhinoplasty is a complex procedure requiring technical skill and a deep understanding of facial aesthetics. The goal is to help patients achieve their desired look while maintaining natural proportions that enhance overall facial harmony.

The procedure suits individuals looking to correct nasal asymmetry, reduce or refine the nose?s shape, or address breathing difficulties. Dr. Stavrou performs open and closed rhinoplasty using state-of-the-art techniques, tailoring the approach to each patient?s needs. The European Institute of Plastic Surgery also offers revision rhinoplasty for those who have undergone previous procedures and seek corrective treatment. Additionally, the institute provides cutting-edge ultrasonic rhinoplasty, a technique that uses ultrasonic energy to reshape the nasal bones with greater precision and less trauma to surrounding tissues. This advanced method reduces swelling, minimal bruising, and a faster recovery than traditional techniques.

EIPS provides liquid rhinoplasty using dermal fillers to reshape minor nasal irregularities for patients who prefer a non-surgical approach. While this option offers temporary results, its longevity depends on post-treatment care and the patient?s natural healing process. It is a popular choice for individuals considering rhinoplasty but hesitant about committing to surgery. Non-surgical rhinoplasty is also an excellent option for those who wish to preview potential surgical results before making a final decision.

With the expansion of rhinoplasty services in Limassol, patients now have increased access to world-class plastic surgery in a convenient and comfortable setting. The European Institute of Plastic Surgery ensures a seamless experience by offering personalised consultations, cutting-edge technology, and a highly trained medical staff. The clinic?s patient-centred approach ensures that each individual receives comprehensive guidance throughout their surgical journey, from pre-operative assessments to post-operative care, minimising risks and maximising satisfaction.

A patient expressed gratitude for Dr. Stavrou?s expertise, describing him as highly professional and detail-oriented. They praised his dedication, honesty, precision, and the kindness and care provided by his nursing team. The patient further recommended his services to an international network and expressed interest in undergoing future procedures at the European Institute of Plastic Surgery.

Beyond the aesthetic improvements that rhinoplasty provides, the procedure also carries significant functional benefits. Many patients seek rhinoplasty to improve nasal airflow, alleviate chronic congestion, and correct anatomical deformities that may contribute to snoring or sleep apnea. EIPS ensures that patients receive the

most comprehensive treatment by addressing rhinoplasty's cosmetic and medical aspects.

The European Institute of Plastic Surgery is dedicated to providing a comprehensive experience, from the initial consultation to post-surgical care, ensuring each patient receives the highest medical attention and aesthetic expertise. The clinic?s commitment to innovation, patient safety, and outstanding surgical results has positioned it as a leader in rhinoplasty procedures within Cyprus and internationally.
