Waste Away Services Launches Roll-Off Dumpster Rentals Across East Texas Counties

East Texas ? March 10, 2025 ? Waste Away Services has officially launched its roll-off dumpster rental operations serving Smith, Van Zandt, Henderson, and Cherokee counties. The company now provides waste management solutions for residential, commercial, and construction projects in Tyler, Canton, Athens, Jacksonville, Lindale, and Chandler, TX.

The new service enables area residents and businesses to book dumpster rentals through an online platform, with options available for various project sizes. Waste Away Services handles delivery, pickup, and proper disposal of waste materials by local regulations.

"The expansion into these East Texas communities addresses a growing regional need for accessible waste removal options," said Nick Johnson, owner of Waste Away Services. "Our goal is to support local

development while ensuring responsible waste management practices."

The company offers multiple dumpster sizes to accommodate different project requirements. The 10-yard dumpster is suitable for small renovation projects and residential cleanouts, while the 15-yard and 20-yard options serve medium-sized projects such as roofing jobs and large home cleanouts. For commercial construction or significant renovation projects, 30-yard and 40-yard dumpsters are available, providing ample capacity for substantial debris removal.

According to recent county data, construction permits in the service area have increased by 15% over the past year, creating heightened demand for efficient waste removal solutions. The growing population in East Texas communities has also contributed to increased residential renovation activities, with homeowners seeking reliable disposal options for household cleanouts and improvement projects.

"Many local contractors previously had to coordinate with waste management companies from larger metropolitan areas, often resulting in scheduling delays and higher costs," Johnson explained. "Our local presence allows for more responsive service and better understanding of community needs."

The locally-owned company works with area landfills and recycling facilities to promote environmentally responsible disposal methods. Through these partnerships, Waste Away Services helps divert recyclable materials from landfills when possible, supporting broader sustainability efforts in the region. The company follows strict waste sorting and disposal protocols, particularly for materials requiring special handling.

The online booking system implemented by Waste Away Services streamlines the rental process. Customers can select dumpster size, delivery date, and location through a user-friendly interface. The system also provides educational resources about weight limits, prohibited items, and best practices for efficient dumpster usage.

Several early customers have reported positive experiences with the new service. A local contractor, Eddie Fleming, noted the timely delivery and competitive pricing structure. "Having reliable dumpster service makes a significant difference in keeping construction projects on schedule," Fleming stated. Homeowner Robert Ruger highlighted the company's responsiveness during his kitchen remodeling project, while Lauren Duren commented on the service's professionalism.

Waste Away Services has also established relationships with several local construction companies and property management firms to provide ongoing waste management solutions for their projects. These partnerships help ensure consistent service quality while supporting other East Texas businesses.
