

Go Industries Unveils Tough and Innovative International CV515 Grille Guard Replacement Line

April 14, 2025

Richardson, TX - April 14, 2025 -
Go Industries Inc. is excited to announce its newly updated line of Medium Duty Grille Guards. These guards are designed to be tough and are now available for a range of truck models, including the Chevrolet C4500, Chevrolet C6500, International CV515, Ford F650, and Ford F750. Since 1978, Go Industries has been a leading provider of truck accessories and custom manufacturing, proudly making all products in the USA. This commitment brings customers quality and reliability they can count on.

The new Medium Duty Grille Guards feature a distinctive design that allows for easy installation with no cutting or drilling required. They are specifically engineered with the tilt body design in mind, allowing the guards to pivot forward to provide convenient hood access. This design not only simplifies maintenance tasks but also makes adjustments a breeze. Additionally, the inclusion of a winch tray supporting up to a 16.5k winch caters to most available winch brands, making them an ideal choice for anyone looking for a ford truck grille guard.

The CEO of Go Industries shared the company's thoughts on this release: "We always aim to deliver solutions that fulfill our customers' needs. Our Medium Duty Grille Guards promise a strong and secure fit while still offering the flexibility needed to reach important truck parts. We believe our clients will appreciate the blend of form and function in these products."

The grille guards showcase a fully welded build, including headlight brush guards made from sturdy 1.9" 14 gauge tubing and 2.5" center cross tubes. The laser-cut center screen, crafted from 18 gauge material, adds both durability and a pleasing look. With a black textured powder coat finish, the guards are well-protected against harsh weather conditions. This attention to detail is a testament to Go Industries' high manufacturing standards.

Besides protecting vehicles, these grille guards are practical for various truck-related tasks. They align precisely with the truck's body frame, ensuring a snug fit that doesn't disrupt the truck's aerodynamics. Moreover, the use of OEM-style latches and safety pins in the locking mechanism guarantees a reliable and secure mount.

Beyond grille guards, Go Industries also provides heavy duty headache racks and bumper replacements that are built for rugged use. These accessories are seamlessly designed to enhance truck utility in tough environments.

The Product Development Manager at Go Industries expressed the company's satisfaction with the new range, stating: "Our customers value reliability and durability. They know our heavy duty truck grille guards can withstand difficult conditions while maintaining easy functionality."

These grille guards give law enforcement and commercial fleets more options, delivering dependable solutions without compromising performance. Go Industries also offers custom manufacturing services, catering to specific customer requirements, including the special cv515 grille guard replacement options.

As demand for customization rises, Go Industries allows customers to tailor their specifications to best suit their needs, whether it's for a simple replacement or an upgrade for a specific model line. For more details, customers can explore these options on the Go Industries website, which also includes comprehensive resources like product instructions, specifications, warranty information, and more.

For more information on the range of available products, including grille guards and accessories, visit the Go Industries website. The site offers detailed specifications, customization options, and purchasing information to help customers make informed choices.

As the industry continues to change, Go Industries is committed to leading with practical solutions, crafted with innovation straight from their Texas facility. They strive to ensure that their products not only meet but exceed expectations in both function and durability.
