

Moneyat30 Delivers an In-Depth First-Person Review of the Yale Assure Lock 2 Touch Smart Door Lock

April 10, 2025

Springfield, Missouri - April 10, 2025 -

Moneyat30, a trusted platform for actionable personal finance insights and product reviews, today released a comprehensive first-person review of the Yale Assure Lock 2 Touch, a cutting-edge smart door lock that merges seamless integration with daily convenience. Authored by Kyle Burbank, the review highlights how this device tackles common pain points for homeowners eager to balance security, comfort, and technological efficiency.

A First-Hand Look at Smart Lock Innovation

Kyle Burbank?s review begins with the story of his first home purchase in 2023, setting the stage for why he chose the Yale Assure Lock 2 Touch as part of his initial upgrades. As a new homeowner seeking modern solutions for security and convenience, Burbank opted for the WiFi-enabled version of the lock with fingerprint recognition capabilities. His decision to invest in this premium product reflects a growing trend among consumers who prioritize seamless integration of technology into their daily lives.

The Yale Assure Lock 2 Touch is designed to offer multiple entry options, including fingerprint access, keypad codes, and traditional keys. Its sleek front panel remains blank until activated by touch, revealing a user-friendly interface that simplifies entry. On the interior side, the lock features a battery housing and a Smart Module for WiFi connectivity, enabling remote monitoring and control through the Yale Access app.

Installation Insights: Challenges and Solutions

One of the highlights of Burbank?s review is his candid account of the installation process. While generally straightforward, he encountered an unexpected challenge due to his door?s unique deadbolt slot design. The lock?s included deadbolt chamber was incompatible with his circular slot, requiring him to purchase an additional $5.90 part from Yale?s website. Despite this minor setback?and the annoyance of paying more for shipping than the part itself?the issue was resolved successfully.

This narrative underscores an important takeaway for prospective buyers: understanding your door's specifications before purchasing can save time and money. Burbank?s experience serves as a helpful guide for others considering smart locks, emphasizing the importance of preparation when integrating new technology into existing setups.

Everyday Convenience: A Year in Review

After more than a year of use, Burbank reflects positively on the Yale Assure Lock 2 Touch?s performance. One standout feature is its fingerprint access, which he describes as transformative for simple tasks like locking up before walking his dog. Additionally, he highlights the lock's durability and efficiency?requiring only one battery change over twelve months due to relatively low usage.

The review also delves into advanced features enabled by WiFi connectivity. Using the Yale Access app, Burbank was able to set up temporary entry codes for house guests with ease. He praises the app?s intuitive interface for creating and deleting codes but notes that initial instructions might confuse some users by suggesting unnecessary contact invitations during setup. This functionality proved invaluable for granting remote access to trusted individuals such as neighbors or dog walkers?a testament to the lock's adaptability in various scenarios.

Balancing Cost with Value

While acknowledging that traditional locks remain effective for most households, Burbank concludes that the Yale Assure Lock 2 Touch offers significant advantages in terms of convenience and modern features. At a price point of $279.99 (or $252 with discounts), it may not be essential for every homeowner but it represents

a worthwhile investment for those seeking enhanced security and usability.

The full review, including additional insights and real-world testing impressions as well as tips on how to save 10% off the retail price, can be found at Moneyat30.com A Quick Yale Assure Lock 2 Touch Review ? Is it Worth the Cost?
