

New Colorado Epoxy Floor Coverings Released By EpoxyColorado

June 04, 2015

June 04, 2015 - PRESSADVANTAGE -

EpoxyColorado, a company based in Fort Collins, Co, has today released brand new Colorado epoxy floor coatings. These coatings can be used to improve the look of a garage, basement or patio floor, making them look fresh and new. As the weather gets nicer and people are starting to think about renewing their flooring, EpoxyColorado hopes to attract a greater deal of customers.

"Epoxy flooring is one of the best garage floor options available on the market today," says Larry Cain from EpoxyColorado.com. "It is affordable, easy to clean and very low in maintenance. Best of all, it looks great. As epoxy flooring specialists, we are ready to discuss requirements with home owners."

There are many benefits to choosing epoxy flooring. Firstly, it provides a seamless surface that is very easy to clean. This is one of the reasons why it is so popular in basements, garages and patios, as these are also areas where spillages of substances that are hard to clean are very common. By choosing epoxy, there is no risk of these fluids getting into grooves or joints.

Secondly, it is very durable and very nice to look at. Epoxy truly does last a lifetime and it looks brand new for as long as it is down. It offers a high gloss shine that always looks clean and fresh. Available in various colors, it is even possible to personalize the look and feel of the area on which it is used.

"Epoxy flooring offers many fantastic benefits," adds Larry Cain. "One of the greatest ones is the fact that it is chemically resistant. This is why we recommend it for garages in particular, where people often store not only their vehicles, but also various other products with high chemical contents. If one of these should spill or fall, the floor will not be damaged in any way."

Another great benefit of epoxy is that it is very environmentally friendly, something that consumers are actively looking for. It can also be applied very quickly, which means there is no need to have an area of a home out of operations for an extended period of time. Rather, it is a self-leveling material. This means it can also be laid directly over an existing floor, so there is no need to first take something else up.

People are particularly attracted by the epoxy floor coverings because they are so affordable. Part of this is due to the fact that installation costs are minimal, but the material itself is also far more affordable than many other flooring options. Furthermore, since it is so hard wearing, maintenance costs are also very low. This means that, over the course of a lifetime, epoxy is nothing short of cheap.
