Falmouth Residents Can Now Take Advantage of the Mass Save® Rebate Program

April 11, 2025

BEDFORD, MA - April 11, 2025 -
Falmouth, MA ? Falmouth homeowners and renters now have the opportunity to lower energy expenses and improve home comfort with the help of the Mass Save® Rebate Program, available through Revise, Inc. As a trusted partner of the program, Revise, Inc. is committed to making energy-efficient upgrades more accessible and affordable for residents across the region.

The Mass Save® Rebate Program in Falmouth offers significant financial incentives for energy-efficient home improvements, including insulation upgrades, heating and cooling system replacements, and high-efficiency water heaters. By participating in the program, homeowners and renters can receive generous rebates that help offset the costs of making these important upgrades, leading to long-term energy savings and a reduced carbon footprint.

Energy efficiency assessments are the first step in taking advantage of the program. A Mass Save® No-Cost Home Energy Assessment conducted by Revise, Inc. provides residents with a customized plan for improving energy efficiency. This assessment includes a thorough evaluation of insulation, heating and cooling systems, and overall home energy performance.

Once the assessment is complete, eligible homeowners can move forward with insulation and weatherization upgrades, which significantly reduce energy loss and improve indoor comfort. The Mass Save® Rebate Program provides up to 75-100% off insulation installation costs, making it one of the most valuable offerings for homeowners looking to enhance energy efficiency. Proper insulation helps homes maintain consistent indoor temperatures, reducing the need for excessive heating in winter and cooling in summer, which ultimately lowers utility expenses.

Heating and cooling systems account for a significant portion of a home?s energy usage. Through the Mass Save® Rebate Program in Falmouth, residents can access rebates on energy-efficient heat pumps, central air conditioning units, and high-efficiency furnaces and boilers. Upgrading to modern, energy-efficient systems not only ensures better performance but also provides long-term cost savings. Heat pumps, in

particular, have become a popular option due to their ability to provide both heating and cooling efficiently while using less energy than traditional systems.

Financing options are available for residents looking to make substantial energy-efficient improvements. The Mass Save® HEAT Loan provides 0% financing for eligible energy upgrades, allowing homeowners to spread the cost of improvements over time while benefiting from immediate energy savings. This financing option makes it easier to invest in long-term energy efficiency without the burden of upfront costs.

Participation in the Mass Save® Rebate Program is not just about financial savings. It is also an opportunity to contribute to a more sustainable future by reducing overall energy consumption and decreasing greenhouse gas emissions. By making homes more energy-efficient, residents play a role in supporting statewide efforts to reduce energy demand and promote environmental responsibility.

Falmouth residents interested in taking advantage of the Mass Save® Rebate Program can schedule a no-cost Home Energy Assessment conducted by Revise, Inc. and begin the process of improving their home?s efficiency. With substantial rebates, expert guidance, and accessible financing options, making energy-efficient upgrades has never been easier or more affordable.

For more information or to schedule a Mass Save® No-Cost Home Energy Assessment conducted by Revise, Inc., residents of Falmouth can visit Revise, Inc.?s website or contact their customer service team. Appointments are now open, and availability is expected to fill quickly as more residents become aware of this valuable service.
