

Bloomington's Top Spray Foam Company Upgrades Insulation Services for Energy-Efficient Homes

April 22, 2025

April 22, 2025 -

Spray Foam Insulation Plus, a well-known spray foam insulation contractor in Bloomington, has announced an upgrade to its insulation services in the Minneapolis-St. Paul Twin Cities Metro Area. This company focuses on providing insulation solutions that make homes more energy-efficient and improve indoor air quality. They have earned a strong reputation and a 5-star review by sticking to high standards of quality and customer satisfaction.

Their website offers detailed information on their comprehensive insulation services throughout Minnesota. Their spray foam insulation is incredibly effective at sealing buildings to prevent air leaks. This makes it a top choice for long-term insulation solutions. It not only helps maintain better air quality inside homes but also protects them from mold and moisture, which can cause damage over time. The company ensures that their expert team, all well-trained and certified, handles each insulation project.

Travis, a spokesperson for Spray Foam Insulation Plus, stated, "At Spray Foam Insulation Plus, we're

dedicated to providing top-quality insulation services that fit our clients' needs. Our mission is to improve energy efficiency, which cuts down utility bills and keeps homes comfortable year-round."

The insulation techniques used by Spray Foam Insulation Plus in Bloomington stand out for their ability to expand and adhere, ensuring full coverage and sealing out drafts. This insulation approach helps maintain a steady indoor temperature, cutting back on the need for heating and cooling systems. Durable and effective, spray foam insulation is an excellent investment for homeowners looking to keep their property comfortable and valuable.

In addition to spray foam, the company provides various insulation options, including fiberglass, cellulose, and attic insulation. Fiberglass offers an affordable and fire-resistant solution, whereas cellulose is an eco-friendly choice made from recycled materials that are treated for fire safety. The right option is chosen based on the specific requirements of the home and the homeowner's budget.

Spray Foam Insulation Plus is also a preferred contractor for energy rebates from Xcel Energy and Centerpoint Energy, which can be further explored through their dedicated webpages on energy rebates. Homeowners benefit not only from reduced energy bills but also from potential rebate savings. They also offer energy audits to uncover any insulation gaps or inefficiencies, providing advice on how to improve them.

Customer service is a top priority, which is why they are available 24/7 to answer questions or set up free estimates for insulation projects. They serve areas across Minnesota, making them a dependable choice for those in the Twin Cities and further afield.

"Our customers' trust is what drives us to keep up the quality we've established," Travis noted. "Every project we complete successfully boosts our reputation as a dependable spray foam company in Bloomington."

With their consistent high ratings and 5-star review, Spray Foam Insulation Plus in Bloomington shows a strong dedication to excellence in the insulation field. Using their expertise and top-grade materials, they strive to ensure that every home gains the benefits of quality insulation.

For those interested in their services or would like an energy audit, reach out by phone or email to Spray Foam Insulation Plus. Their website also offers detailed information on services, showing how proper insulation can lead to immediate savings and long-term benefits for one's home.
