ThrIVe Health Hosting Thyroid Eye Disease Educational Seminar in Las Vegas

April 18, 2025

April 18, 2025 -
Las Vegas, NV ? Living with Thyroid Eye Disease (TED) can be a challenging experience, but thrIVe Health is offering an opportunity for patients, caregivers, and medical professionals to come together for support and education. The organization is hosting a Thyroid Eye Disease Patient Support & Educational Seminar in Las Vegas, where attendees can learn about the symptoms, treatment options, financial assistance, and other support resources available for those living with TED.

Event Details: Saturday, May 3rd at 11:00 AM at the JW Marriott ? Summerlin at 221 N Rampart Blvd, Las Vegas, NV 89145

Guest Speakers: A key speaker at the event will be Dr. Raymond S. Douglas, MD, PhD, a world-renowned expert in Thyroid Eye Disease (TED) and a leader in the development of innovative treatments for the condition. Dr. Douglas will join other distinguished speakers in sharing critical insights into TED, from identifying its symptoms to discussing the latest treatment options. His wealth of knowledge and experience makes him a trusted figure in the TED community.

The Seminar Will Feature In-Depth Discussions On A Variety Of Topics, Including: Identifying the Symptoms of Thyroid Eye Disease, Treatment Options and Innovations in TED Care, Navigating Financial Hurdles, and Building Patient Support Communities

Attendees will have the opportunity to ask questions, engage with experts, and gain valuable insights on managing TED, all while connecting with others facing similar challenges.

About Dr. Raymond S. Douglas: Dr. Raymond S. Douglas is an internationally recognized aesthetic and reconstructive oculoplastic surgeon based in Beverly Hills, California. With over 15 years of experience specializing in TED, Dr. Douglas is known for his groundbreaking work in understanding and treating the condition. His pioneering research has significantly contributed to the development of Tepezza, the first FDA-approved medication for TED, which he helped bring to market. Dr. Douglas was the principal investigator in the international clinical trials that led to Tepezza?s approval and was the first physician in the world to administer the treatment to patients post-approval.

In addition to his role in TED research and treatment, Dr. Douglas is a respected educator, serving as a professor at Cedars-Sinai Medical Center in Los Angeles, where he heads the orbital and TED programs. His extensive background includes a medical degree and doctorate in immunology from the University of Pennsylvania, followed by an orbitofacial plastic and reconstructive surgery fellowship at the prestigious UCLA Stein Eye Institute.

Dr. Douglas? expertise is sought after worldwide, with patients traveling from both across the country and internationally to benefit from his specialized care. At his Beverly Hills practice, he offers both surgical and nonsurgical TED treatments, with an emphasis on helping patients regain their pre-diseased appearance. He has also pioneered TED transformations, combining aesthetic and functional procedures to help patients feel like themselves again.

Dr. Douglas believes in a holistic approach to treatment, blending medical care with lifestyle and wellness recommendations tailored to each patient?s unique needs. His emphasis on an anti-inflammatory lifestyle, healthy living, and wellness has been integral to his success in helping patients manage TED and improve their quality of life.

Registration Information: This seminar offers a valuable opportunity to connect with TED experts, gain insights on the latest treatment options, and engage with others who understand the challenges of living with Thyroid Eye Disease.
