

Commercial Plumbing In San Mateo County Now Includes Grease Trap Clean-Out

February 12, 2016

February 12, 2016 - PRESSADVANTAGE -

Rooter Hero Plumbing of the San Mateo Metro area, located in Menlo Park, CA, announces the addition of grease trap clean-out on top of their regular drain and sewer line cleaning services. This service is available 365 days out of the year for commercial properties in the metro area. Full details are available at <https://rooterhero.com/san-mateo>.

Jessica Perrault, a spokesperson for Rooter Hero Plumbing, says: "It is very important to make sure that grease traps continue to function. Businesses in the food service industry that have heavy kitchen use require cleanouts on a regular basis. Grease traps contain vegetable oils and animal fats. As these substances build up, clogs form and back up the lines. Not only does this cause bad odors, but it can potentially shut down a business? kitchen for several days. The bottom line is that clogged grease traps are not good for business."

Grease trap maintenance is an essential part of Rooter Hero Plumbing?s commercial drain cleaning service in San Mateo County. By creating a schedule for their clients, they aim to help them save both time and money. Naturally, they also continue to offer emergency repair service so that if something goes go wrong, they can come out and fix it straight away.

The service is already being very well-received by their many clients, particularly restaurants in the area. "I started to notice a smell coming from the kitchen and it was affecting my business, quite rightly so," says San Mateo restaurant owner, Javier Barrera. "Nobody wants to eat in a restaurant that stinks of garbage. Rooter Hero Plumbing quickly found the issue and resolved it. They scraped all the hardened grease away and cleaned the trap leaving it spotless. I'm taking advantage of their drain cleaning maintenance package so that I won't find myself in this situation again."

Once Rooter Hero Plumbing gets rid of the grease from the clean out their job isn't finished. They must dispose of the grease in an environmentally-friendly way, only using licensed processing facilities and following all the necessary regulations for grease cleaning, transport, and disposal.

Rooter Hero Plumbing can be reached at 650-488-6049 for further comment or inquiry into their grease trap cleanout process.
