Wilmington Dermatology Center Announces the Launch of Ariessence Pure PDGF+

May 28, 2025

May 28, 2025 -
Wilmington, NC ? May 2025 ? Wilmington Dermatology Center, a premier dermatology and aesthetics practice in North Carolina, is thrilled to introduce Ariessence Pure PDGF+, the first and only aesthetic product featuring an FDA-approved growth factor designed specifically for skin rejuvenation.

This groundbreaking treatment offers an advanced, non-invasive approach to restoring youthful, radiant skin?without the need for blood draws or patient-derived variability.

Ariessence Pure PDGF+ is powered by platelet-derived growth factors (PDGF)?essential proteins that play a crucial role in cell growth, tissue repair, and collagen production. With four FDA approvals and over 15 years of medical use, PDGF is one of the most trusted regenerative ingredients in dermatology and aesthetics.

?At Wilmington Dermatology Center, we are committed to bringing our patients the most cutting-edge, effective treatments available,? said Dr. Rosalyn George, Founder of Wilmington Dermatology Center.

?Ariessence Pure PDGF+ is a game-changer in aesthetic medicine, providing consistent, predictable, and impressive results for a wide range of skin and hair concerns?all without the invasiveness of traditional treatments.?

Unlike traditional platelet-rich plasma (PRP) therapies, which require a blood draw and can vary in efficacy due to patient differences, Ariessence Pure PDGF+ is a bioidentical, lab-derived form of PDGF. This ensures higher purity and potency, delivering up to 300,000 times more growth factors than standard PRP treatments.

Once applied, Ariessence Pure PDGF+ activates the body?s natural skin renewal processes to promote comprehensive rejuvenation. It boosts collagen and elastin production, helping to firm and tighten the skin for a more youthful appearance.

By promoting angiogenesis, it enhances circulation and nutrient delivery, supporting healthier skin from within.

Additionally, Ariessence encourages cell proliferation and repair, stimulating new skin cell growth for a refreshed, radiant look. Finally, it aids in tissue remodeling, strengthening the skin?s structure for lasting improvements over time

Ariessence Pure PDGF+ delivers a powerful blend of regenerative benefits that make it a standout in skin and scalp rejuvenation.

Designed to support skin repair and renewal at a cellular level, it helps promote smoother, firmer skin with visibly improved texture. Fine lines and wrinkles are noticeably reduced, while scars?including stubborn acne scars?gradually fade over time.

It also accelerates post-procedure healing, making it ideal for use after aesthetic treatments. In addition to its anti-aging properties, Ariessence Pure PDGF+ enhances skin luminosity, boosts hydration, and fortifies the skin?s natural barrier against environmental stressors.

When applied to the scalp, it can even promote hair regrowth, offering a holistic approach to beauty and restoration.

Ariessence Pure PDGF+ is highly versatile and integrates seamlessly into a wide range of in-office aesthetic treatments to maximize results. It is commonly used in conjunction with microneedling procedures on both the face and scalp, where it enhances collagen production and accelerates tissue repair.

The serum also pairs well with fractional laser treatments, helping to calm inflammation and speed up

recovery while improving skin clarity and texture. For delicate areas like the under-eyes, Ariessence Pure PDGF+ can be used during rejuvenation injections to target fine lines, puffiness, and dark circles, amplifying the benefits of the treatment.

Its compatibility with these procedures makes it a valuable addition to any advanced skincare or hair restoration protocol.

?We see Ariessence Pure PDGF+ as a revolution in skin and hair rejuvenation,? said Dr. George. ?Whether patients want smoother, firmer skin or thicker, healthier hair, this treatment delivers results without downtime or invasive procedures.?

For optimal results, most patients undergo three to six treatments, spaced four to six weeks apart. While initial improvements?such as increased hydration and radiance?can appear within days, collagen production steadily increases over four to eight weeks, leading to firmer, youthful-looking skin. Scalp treatments typically show stronger, thicker hair growth within a month.

With minimal downtime, patients may experience only mild redness or swelling for 24 to 48 hours. Results can last up to a year, with follow-up treatments extending benefits.

As one of the nation?s top aesthetic practices?recognized as the #1 Botox provider in North Carolina?Wilmington Dermatology Center remains committed to bringing state-of-the-art treatments to its patients.
