

Kawak Aviation Expands Helicopter Firefighting Solutions with Innovative Efficiency Boosts

May 16, 2025

Bend, Oregon - May 16, 2025 -
Kawak Aviation Technologies Inc. has announced that it's expanding its lineup of helicopter firefighting solutions. With over 30 years in the aviation industry, Kawak Aviation is boosting efficiency and reliability in fighting fires from the air. Known for its quality and innovative equipment, the company is committed to providing tools that support aerial firefighting teams around the world.

The company has built a strong reputation for creating dependable products. Their services cover areas like aerial agriculture and electric motors, highlighting both their versatility and dedication to customer satisfaction. One of their standout features is the ability to cut down on hover refill times, allowing firefighting crews to be more efficient. This reliability helps clients secure and maintain fire contracts in a competitive field.

Kawak offers various tools for helicopter firefighting, including Refill Pumps and Fire Buckets. These tools are designed to boost efficiency during missions. The Refill Pumps reduce the time needed for helicopters to

reload with water, which is vital during active firefighting efforts. Fire Bucket, on the other hand, is built to last and adapt in tough conditions, which helps improve the chances of success when fighting fires. More details on these products and other solutions can also be accessed through their main website.

Mark Lawler, CEO of Kawak Aviation Technologies Inc., is proud of these advancements. "Our focus has always been on producing reliable and innovative mission equipment. With these enhancements in our aerial firefighting solutions, we aim to support our customers in their critical missions and contribute positively to firefighting efforts worldwide," he said.

The company's FAA Part-145 Air Repair Station certification adds another layer of excellence. This means they can handle maintenance, repair, and overhaul services, ensuring their products always perform at their best. Customers appreciate this level of commitment and often praise the company's outstanding service and ability to meet their high demands.

Beyond firefighting equipment, Kawak Aviation offers electric motors, accessory drive mission power systems, and aircraft throttle quadrants. These products are engineered with special materials and methods to withstand harsh conditions and last longer.

"At Kawak Aviation, we believe in pushing the boundaries of what's possible in mission equipment," said the director of engineering. "Our team is continually researching and developing products tailored to the dynamic needs of our industry, ensuring that our clients are equipped with the best tools to accomplish their missions."

Their support services are just as thorough as their product offerings. Kawak provides engineering and manufacturing services, hydraulic system design, aero structure and nacelle design, FAA certification, and DO-160 testing. They also run a certified part 145 repair station, ensuring customers receive full support from the start to the finish of their projects.

Kawak's commitment to innovation keeps it at the cutting edge of the aviation mission equipment industry. By enhancing its firefighting capabilities, Kawak remains dedicated to developing solutions that meet the challenging needs of teams dealing with wildfires that are becoming more complex and frequent.

This combination of cutting-edge solutions and reliable service positions Kawak Aviation as an important figure in the aviation industry, positively influencing efforts around the globe. Find out more about their suite of services and products, including Refill Pumps and Fire Buckets, at their website.
