

Voiso Empowers Sales and Marketing Teams to Harness Practical Al for Real Results

June 17, 2025

SINGAPORE, SG - June 17, 2025 - PRESSADVANTAGE -

In an era where AI is often reduced to marketing jargon and experimental features, Voiso is charting a different path, one that puts practical, integrated AI in the hands of real sales and marketing teams to drive measurable growth.

According to Christiana Ioannou, Digital Marketing Manager at Voiso, the key to leveraging AI effectively isn?t about adding flashy new tools, it?s about embedding AI where it matters: in the daily workflows of growth teams under pressure to deliver results.

?Al is no longer the future, it?s late to the meeting,? says loannou. ?Sales and marketing leaders don?t need more dashboards. They need insights they can act on in real time, inside the tools they already use.?

One of the greatest challenges for go-to-market teams has been the challenge of closing the loop between insights and action, the lag between learning and execution. Traditionally, marketers rely on intuition and

lagging indicators to shape campaigns, while sales teams struggle with fragmented feedback loops. Voiso?s integrated AI suite aims to change that.

With Al-powered Speech Analytics, Voiso surfaces real customer pain points, objections, and sentiment from calls and messages, transforming raw conversations into campaign-ready insight. Marketing no longer needs to guess what prospects care about. They can see it, hear it, and act on it, instantly.

?With tools like Voiso, teams are no longer building strategies in a vacuum,? says loannou. ?They?re building with context, with clarity, and with confidence.?

The historical divide between sales and marketing has often come down to timing; aligning sales and marketing around live data is key moving forward. Marketing pushes out messaging. Sales provides feedback, usually too late to matter.

Voiso helps break that cycle. By centralizing real-time insights from across the funnel, both teams can operate from a shared understanding of what is resonating with customers and what?s not.

And the impact is clear: updated talk tracks, smarter lead qualification, and campaign messaging that reflects what buyers are actually saying, not what teams think they?re saying.

Voiso?s platform isn?t about replacing people, it?s about removing friction; that is why automation is used where it matters most, not everywhere; the human touch is always important. From automated lead scoring and call tagging to real-time call summaries and follow-up suggestions, Voiso enables sales reps to focus on high-value conversations instead of repetitive admin tasks.

The result is more time spent on coaching, negotiating, and relationship-building, and fewer hours lost to note-taking, CRM updates, or trying to make sense of disconnected metrics.

?The most successful teams aren?t just faster, they?re smarter,? says loannou. ?They don?t just respond, they anticipate. That?s the advantage AI can bring when it?s embedded intentionally.?

All is utilized as a strategic partner not as a silo. Voiso is seeing strong results among organizations that embed All across the entire customer journey, from lead intent to post-sale follow-up. The secret, according to loannou, is not treating All as a standalone experiment but as a core component of everyday strategy.

Teams that integrate Voiso?s AI tools report greater alignment between departments, better coaching opportunities for managers, and higher conversion rates from smarter, context-driven messaging.

?Growth today isn?t about who has the biggest tech stack, it?s about who learns faster and connects better,?

Ioannou adds. ?Voiso isn?t just a contact center platform. It?s an Al-powered growth engine built for teams

that want to do more with less, without losing their human touch.?

About Voiso

Voiso is a global leader in Al-powered contact center software. Designed for customer-centric sales and

support teams, Voiso?s platform offers omnichannel communication, real-time dashboards, AI speech

analytics, and predictive dialing?all built to enhance productivity, simplify workflows, and elevate the customer

experience.
