

Plumber Chandler Launches New Website And 24/7 Emergency Service

February 04, 2016

February 04, 2016 - PRESSADVANTAGE -

Plumber Chandler, a plumbing business in Chandler, AZ, has announced that they have launched a brand new website and that they now offer a 24/7 emergency service. The new website, which can be accessed through <http://plumberchandler.net>, highlights the details about this new service, as well as the existing plumbing services that they offer.

Chris Langer from Plumber Chandler says: "Our new website looks absolutely amazing. We are really impressed with the design team, who took our vision and turned it into a reality. And now that we offer a 24/7 emergency service, it was really important to also have a store front that is accessible around the clock, which is exactly what our website does."

As part of their new website and new service, the company has also launched a significant social media campaign. The Plumber Chandler Twitter page is already attracting a lot of followers. This page is mainly used to promote industry news and developments, but it also provides an opportunity for customers to contact the company directly, ask questions or share testimonials. The Facebook and Google+ pages that the company has launched serve a similar purpose.

Those who have used Chandler Plumber services have been overwhelmingly happy with the service that they received. "There's nothing worse than coming home from a business trip and finding your home has flooded while you were away because of a broken pipe," says Carl P. "Unfortunately, that is exactly what happened to me. Luckily, Plumber Chandler was able to come out straight away and sort out the problem. They fixed the pipes and put me in touch with someone who could help me with the flooding itself. I can't thank these guys enough."

The design team that the plumbing company used also provided them with further advice on how to increase their online authority, brand recognition and overall customer database. They encouraged the company to also think about video marketing, as this gives people a more personal relationship with the company. As a result, they have released their very first Plumber Chandler video on YouTube, which discusses the vision and history of the company, as well as the services that they offer.
