

Chunk N Dump Rolls Out Reliable Dumpster Rentals Across Southeast Texas

May 21, 2025

May 21, 2025 -

A new entrant in Southeast Texas? waste management landscape is making waves with a focus on accessibility, community values, and customer service. Chunk N Dump, a roll-off dumpster rental service based in Splendora, Texas, has officially launched, providing tailored waste disposal solutions to residential, commercial, and construction clientele across the region.

Founded by local resident Lance Jones, Chunk N Dump operates with a deep understanding of local needs and a commitment to service that reflects community-rooted values. The company offers scheduled and on-demand delivery of 7-yard, 10-yard, 14-yard, and 18-yard roll-off containers, all designed to manage a broad range of cleanup and debris disposal tasks.

Chunk N Dump serves a wide area including Conroe, The Woodlands, Spring, Cleveland, Humble, Porter, New Caney, Willis, Kingwood, and Montgomery. The company?s mission is to simplify the waste disposal process for both homeowners and businesses, all while ensuring strict compliance with local environmental

and waste management regulations.

According to founder Lance Jones, the inspiration behind Chunk N Dump stemmed from a need he personally witnessed within the community. ?The idea behind Chunk N Dump was to create a service that meets the waste disposal needs of our growing communities with speed, reliability, and accountability,? said Jones. ?We?re excited to contribute to local development and cleanup efforts with a straightforward rental process and dependable service.?

Designed to meet a range of project requirements, Chunk N Dump?s dumpster rental options are ideal for everything from spring cleaning and garage cleanouts to renovation debris and full-scale construction or demolition work. The smaller 7-yard container is perfect for residential users, while the 10-yard and 14-yard sizes are well-suited for remodeling projects or roofing jobs. For larger-scale efforts, the 18-yard container provides a solution that accommodates significant waste volumes.

Each roll-off container is engineered to handle heavy-duty materials such as wood, drywall, roofing shingles, and mixed household or construction debris. With various size options, the company helps customers select the most cost-effective solution while avoiding extra charges due to overfilled containers or incorrect sizing.

Operating from its base in Splendora, Chunk N Dump emphasizes fast response times and efficient scheduling for the surrounding areas. The company leverages local resources for hiring and equipment procurement, helping support the local economy and ensure flexible, responsive service delivery tailored to individual project timelines.

The launch comes at a time when many residents and contractors in Southeast Texas are facing higher costs and service delays in the waste disposal industry. Chunk N Dump aims to combat these challenges by offering a simplified booking system through its website, https://chunk-n-dump.com, where customers can review service options, check container sizes, and make online reservations. For those with more specific needs or questions, customer service is also available by phone to offer direct assistance and customized solutions.

Environmental responsibility is a cornerstone of Chunk N Dump?s operating model. The company partners with licensed transfer stations and recycling facilities to ensure that all collected materials are handled in a sustainable manner. Items are carefully sorted to reduce landfill usage, and all waste is processed in accordance with local and state guidelines, ensuring that recyclables and hazardous materials are managed properly.

To further reinforce its community presence, the company is actively exploring partnerships with local clean-up and beautification initiatives. These efforts are part of Chunk N Dump?s broader vision to give back

and stay engaged with the neighborhoods it serves.

Looking ahead, Chunk N Dump has plans for strategic growth. While its current focus is on Montgomery County and surrounding cities, future expansion may include neighboring counties and the introduction of specialty containers tailored to specific types of waste such as yard clippings, concrete, and heavy demolition debris.

?We?re starting with a strong foundation, but the long-term goal is to grow responsibly with our customers and keep our service standards high,? said Jones.

Chunk N Dump is proud to provide a reliable, efficient, and community-minded dumpster rental service to the people of Southeast Texas. With transparent pricing, multiple container sizes, and a focus on environmentally friendly disposal, the company is poised to make a positive impact on both local cleanups and larger development efforts.
